National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 18). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

SUMMARY DESCRIPTION

Located in Virginia's central Piedmont region and running along both sides of the Southwest Mountains range, the Southwest Mountains Rural Historic District encompasses approximately 31,975 acres of northeastern Albemarle County. The district is bounded on the north by the Orange County line, which also forms the southern border of the Madison-Barbour Rural Historic District; on the east by the Louisa County line and Mechunk Creek; on the south by Rt. 231 and Interstate 64, and on the west by properties adjoining Rt. 20. The district's physical characteristics include a mixture of mountainous, hilly and undulating lowland terrain. An abundance of open land affords expansive vistas of the unspoiled countryside. Cultural features such as farms and crossroads hamlets, circulation routes and road beds, as well as field patterns, tree lines, fence lines, and hedgerows complement the natural landscape elements of streams, hills, and woodlands. The district's broad range of eighteenth-, nineteenth-, and early-twentieth-century architecture reflects the evolving cultural patterns of the district's 260 years of settlement.

Although known primarily for its large and imposing Federal, Greek Revival, and Georgian Revival plantation houses and country estates, the majority of the district's contributing buildings are the products of a continuous vernacular building tradition. Characterized by a dispersed settlement pattern of individual plantations and farms, the district also includes several small crossroads communities established in the eighteenth and nineteenth centuries, including the hamlets of Cismont, Cobham, Keswick, Lindsay and Stony Point, as well as several small rural black settlements established shortly after the Civil War. Although the district is situated near the City of Charlottesville, modern intrusions are relatively few and inconspicuous. Among the architectural resources contributing to the historic character of the district are 109 domestic complexes consisting mainly of farm and estate residences and their associated outbuildings and agricultural buildings. Other contributing buildings include eleven churches, sixteen commercial buildings, and two railroad depots. The district's twenty-eight contributing structures are related mainly to agricultural production, but also include elements such as early-twentieth-century garden walls, swimming pools, and tennis courts. Other contributing resources include sixteen cemeteries. Noncontributing architectural elements include 773 buildings (mostly post-1941 houses and agricultural buildings), forty-two structures (mostly recent outbuildings and agricultural structures), and nine objects (mostly mobile homes). Archaeological resources are not included in this nomination.

STATEMENT OF SIGNIFICANCE

The Southwest Mountains Rural Historic District, is a remarkably unaltered and picturesque rural area northwest of the city of Charlottesville. It has significant associations with historical figures in local, state, and national history; its historic buildings and structures retain considerable integrity; and its rural landscape has remained relatively unchanged despite recent development in surrounding areas. The district contains a broad range of eighteenth- and nineteenth-century architecture as well as early twentieth-century estates with grand manor houses evocative of the district's earlier history. Small rural settlements, each dominated by a railroad depot or country store, as well as more modest farms and rural lots where the traditional I-house or a bungalow may be evident, illustrates the evolution of the Virginia countryside from a plantation-dominated society to the more diverse rural community that characterizes the Southwest Mountains Rural District today. Today's agrarian landscape is dominated by pasture rather than field crops, and many areas that were planted previously are now in woodlands. The emphasis on fox hunting as a recreational and social activity in the district has resulted in the deliberate preservation of enough rural countryside to conduct the hunt. Early road corridors, and curving country lanes shaded by allees of towering cedars and mature deciduous trees, together with fields delineated by old fence and cedar lines enhance the integrity of the district.

The district has strong associations with several of the nation's early intellectual and political figures--including Thomas Jefferson, James Madison, Thomas Mann Randolph, and Nicholas Meriwether--who lived in or near the district and who maintained social, family, and business ties to district residents. In addition the district has strong linkages with the adjacent Madison-Barbour Rural Historic District (which extends for a forty-square-mile area from the Orange-Albemarle line north to the town of Orange). The Southwest Mountains district serves as a geographic link between the historic residences of former United States presidents and friends Thomas Jefferson (Monticello) and James Madison (Montpelier in the Madison-Barbour District) and lies partially within Monticello's viewshed. Together the two districts represent not only the broad influence of Madison and Jefferson on their agrarian society but also reflect

GENERAL DESCRIPTION

The Southwest Mountains Rural Historic District occupies the northeastern portion of Albemarle County and extends from Orange County on the north to the crossroads of Shadwell on the south. The Southwest Mountains chain, which forms a spine down the center of the district, is its predominant geographic feature. A relatively small mountain range located about twenty miles east of the Blue Ridge Mountains, it extends in a southwesterly direction from Orange County on the north to the Rivanna River on the south. Maximum elevations range between 1300 and 1500 feet, from a base of about 500 feet above sea level.

The gently rolling foothills of the mountains are partly in forest and partly in pasture; relatively little land supports cultivated crops today. The ridges of the mountains, most of which have slopes of less than sixteen percent at the lower elevations, are covered by some of Virginia's best agricultural soils. Though the district is characterized primarily by individual farmsteads, it also contains several early twentieth-century crossroads hamlets, including Keswick, Cismont, Lindsay, Cobham, and Stony Point.

The district features a broad range of architecture--mainly domestic and farm-related--from the late eighteenth, nineteenth, and twentieth centuries. Although the most notable buildings are those with Federal, Greek Revival, and Colonial Revival features, the majority of contributing buildings are influenced by a native building tradition. Most noncontributing buildings in the district are also domestic or farm-related, and date to the mid to late twentieth-century.

The earliest European settlers in northeastern Albemarle County (then Goochland County) were Tidewater Virginians who moved there in the early eighteenth century. Much of the land first patented was not settled immediately, but remained as undeveloped holdings for several decades. The first settlers duplicated the land-use patterns of the Tidewater, establishing tobacco plantations worked by slaves, indentured servants, or tenant farmers. In contrast to the more westerly areas of the colony, there were relatively few small farms or subsistence-level holdings in the Southwest Mountains area; most of the land was developed by large landholders.

Building materials, primarily timber-based, were readily available, and the earliest buildings were generally small, crude structures with unhewn log walls and wood-and-clay chimneys. Over time, larger box-framed and hewn-log structures with stone chimneys became common. Although no example of the first generation of dwellings survives in the district, at least one similar-sized building remains: the late-eighteenth or early-nineteenth-century slave house at Valmontis farm (02-559), a simple 12' x 20' box-framed house with stone chimney. The original one-room log unit of the Tuck House (02-409), which may date to the late eighteenth

Continuation Sheet**

Section number 7 Page 3

century, is also typical of freeholder's dwellings of this period.

Farmhouses belonging to wealthier families in the mid and late eighteenth century generally had hall-parlor plans and one-and-a-half story elevations; additions took the form of shed wings added at the back or sides. An excellent, largely unaltered example is the house at Findowrie (02-36), built and enlarged by shed wings in the second half of the eighteenth century. Another example, somewhat more altered, is Maxfield (02-48), which features a basement with a rare, built-in brick bakeoven.

The largest houses, such as the original unit of Castle Hill (02-12), built in 1764, often had central-passage plans, but they too were of frame construction and were generally only a story-and-a-half high. They were distinguished from common houses by their large dimensions and their finer workmanship and decorative detailing. The dining room of Castle Hill, for example, displays handsome glazed corner cupboards with scallop-shell soffits.

All farmhouses of the eighteenth and nineteenth centuries--even the smallest--were surrounded by a bevy of outbuildings and farm structures. Domestic functions such as cooking, curing meat, and processing dairy products took place in detached buildings that formed a complex around the main dwelling. Such plantation groupings might include a kitchen, laundry, smokehouse, dairy, lumber house, carriagehouse, wellhouse, and privy, as well as quarters for domestic servants. Other buildings, located farther from the main dwelling, might include a barn, corncribs, stables, and tobacco houses. Also located at a distance from the planter's house were the quarters of field slaves and their families. These satellite domestic complexes sometimes comprised a dozen or more small houses, often built to accommodate two or more families.

At the time of the American Revolution, Major Thomas Anbury, a British officer quartered at Charlottesville, described the typical plantation in the area:

The plantations are scattered here and there over the land, which is thickly covered with timber. On these there is a dwelling house in the centre, with kitchen, smokehouse, and other outhouses detached, and from the various buildings each plantation has the appearance of a small village. At some little distance from the house are peach and apple orchards, and scattered over the plantations are the negroes' huts, and tobacco barns, which are large and built of wood for the cure of that article.

Few if any outbuildings or farm structures survive in the district from the eighteenth century,

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 4

but a number remain from the early nineteenth century. These include the kitchen, dairy, cornhouse and rare two-room smokehouse at Cloverfields farm (02-17), as well as a variety of outbuildings (some of them brick) at Castle Hill (02-12). A large, circular brick icehouse, perhaps original to the house, stands at Edgehill. Rare early bank barns stand at Happy Creek Farm (02-1079; ante 1820), and at Clover Hill Farm (02-1027; 1844 or earlier).

During the second half of the eighteenth century, the Southwest Mountains region became more densely settled and its economy more complex. Along with the subsistence farms and tobacco plantations that formed the bulk of the built landscape, the early inhabitants of the district erected small-scale industrial enterprises such as gristmills, sawmills, tanyards, distilleries and blacksmith shops. Many families living along major roads put their dwellings to double use as taverns. In addition, enterprising planters established public stores, first on their own plantations, and later at rural crossroads. Anglican, Baptist, Methodist and Presbyterian congregations erected church buildings to serve their needs, and a few of the wealthier and more enlightened planters erected private schoolhouses or academies for their children and those of their neighbors.

Today only a handful of non-domestic buildings survive from the eighteenth or early nineteenth centuries. Walker's Mill (02-109), a stone and frame structure with a date stone of 1783, is one of the earliest documented gristmills in central Piedmont. Merrie Mill (02-49), a larger frame gristmill near Cismont, probably dates to the early nineteenth century. Both buildings retain much of their original fabric, but today they stand abandoned and decaying.

At the crossroads of Stony Point stands Stony Point Tavern (02-362), documented by an 1803 insurance policy. The earliest largely unaltered church in the district is South Plains Church (02-162), a simple rectangular brick structure probably erected in the 1820s for a Presbyterian congregation. No schools or other public or semi-public structures remain in the district from the period before the Civil War.

As in the adjacent Madison-Barbour Rural Historic District, the individual farmstead or plantation was the main organizing unit of the cultural landscape, and it continued as such through the nineteenth and twentieth centuries. Housing quality in the vicinity improved over time, but poorer families continued to live in small, cramped, often poorly-built houses throughout the nineteenth century.

The first large, architecturally sophisticated plantation dwellings appeared in the region in the late eighteenth and early nineteenth centuries. One of the earliest was the original version of Thomas Jefferson's Monticello, located south of the Rivanna River just outside district bounds.

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 7 Page 5

Erected beginning in the 1770s and continuously enlarged and remodeled until 1809, it set the standard for large houses in Albemarle and surrounding counties. Jefferson's knowledge of and fondness for classical architecture informed many of the plantation houses that were subsequently built in the region. The highly skilled carpenters and brickmasons Jefferson brought from Philadelphia and elsewhere to work on Monticello and later the University of Virginia (completed 1826), went on to build houses for other planters in the area.

The earliest and perhaps finest example in the Southwest Mountains Historic District is the 1823-24 section of Castle Hill (02-12), built and probably designed by master brickmason John Perry. It features a symmetrical five-bay central unit with Tuscan portico, flanked by colonnaded one-story wings. Edgehill (02-26), a handsome two-story, double-pile, hipped-roofed mansion was built in 1828 for Jefferson's son-in-law Thomas Mann Randolph, Jr. It displays such favorite Jeffersonian motifs as a bold Tuscan entablature, tetrastyle Tuscan portico, and Chinese lattice railing. On the basis of style and workmanship, this house is attributed to University of Virginia builders William B. Phillips and Malcolm F. Crawford.

Both houses, which were built of brick--Jefferson's preferred building material--reflected the new trend toward more expensive, showy plantation houses in the area. Other examples of large brick houses dating to the period before 1860 include the main units of East Belmont, Edgeworth, Edgemont, Fairmount, Tall Oaks, Red Horse Farm, Clover Hill, Cobham Park, Valmontis, Piedmont Manor and Windsor. In contrast, the equally large plantation houses at Cismont Manor, and Cloverfields were of frame construction, and in that respect are probably more representative of the majority of substantial farmhouses in the area in the antebellum period.

As elsewhere in Virginia, the most frequently used antebellum domestic building type for above-average farm families was the one-story-and-loft frame dwelling, usually a single room deep. It was covered with a gable roof, sometimes with dormers; it stood on masonry foundation or basement, and it was heated by exterior end chimneys of rubblestone or brick. This house type utilized a narrow repertoire of standard floorplans, including the hall-parlor plan, side-passage plan, and central-passage plan. Good examples in the district include the Michie House on St. Margaret's Farm, the "Cottage" at Cloverfields, and the main houses at Maxfield, Dovedale, and Turkey Hill (Old Keswick) farms. The earliest of these is probably Maxfield (02-48), which was moved twice before being re-erected in its present location in the late eighteenth or early nineteenth century.

Such houses could be expanded in a number of ways: by erecting rear or side sheds, a rear ell, or a side wing. Sometimes they were enlarged by erecting an additional freestanding unit that

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 7 Page 6

mirrored--or at least was similar to--the original house. Turkey Hill (02-37) is a case in point. It consists of two separate, nearly identical one-story units joined by a central hyphen to form an H plan. Other example of houses in the district enlarged to form H-plans include Castle Hill, The Riggory, Edgemont and Valmontis.

Occasionally, as at Valmontis (02-559), the original one-story house was raised to a full two stories. Two story houses became increasingly common in the area during mid-nineteenth century. The most popular two-story house form for those who could afford it is commonly referred to as the I-House. This consists of a single-pile dwelling with end chimneys, usually employing a central-passage plan. Good early frame examples of I-houses in the district include the later unit of The Riggory, Breezy Oaks, and Keswick Farm. Brick examples include East Belmont, Edgeworth and Edgemont, and Logon.

The largest two-story houses had two-room-deep floorplans. The most common form was a double-pile, central-passage plan, exemplified by Windsor, Cobham Park and Piedmont Manor, all built in the 1850s. Some houses, however, employed non-standard floorplans. The main house at Clover Hill, built in 1846, is an interesting example, featuring an ell-plan passage giving access to three rooms on the main floor. A few houses, such as that at Punchbowl Farm (ca. 1820s) use an original L plan with a central passage feeding into a side or rear passage.

Antebellum houses in the Southwest Mountains Historic District--even large, expensive ones--tended to have modest detailing. Few if any embody full-blown popular or academic styles; rather, they borrow stylistic details and graft them onto vernacular, or traditional bodies. The Federal, or Adamesque style was the prevalent style in the district from the late eighteenth century to the 1840s; perhaps the best example is the 1823-24 section of Castle Hill. Greek Revival influence can be seen in some houses of the 1850s, and elements of the Italianate style appears in a few large houses built on the eve of the Civil War.

Usually exterior stylistic features are confined to porches, as at at Punchbowl Farm or Turkey Hill; eaves boards or cornices, as at Edgehill or the Carpenter House; or such facade features as the brick pilasters articulating the front of Tall Oaks.

The most stylistically sophisticated nineteenth-century building in the district is not a plantation house, but rather a church. Grace Episcopal Church (02-43) at Cismont is a stone, Gothic-style confection designed by noted Philadelphia architect William Strickland. Commissioned by the Rives family of Castle Hill, it was designed in 1847 and completed shortly afterwards. Despite a fire that destroyed its original interior woodwork, it remains an important local landmark, the only example of Strickland's work in Virginia.

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 7

Attesting to the wealth and architectural variety of the district in the late antebellum period is the stone tower at Springfield (02-1059), a farm near the Albemarle-Orange border. Probably erected around the 1850s, this now-ruinous folly is said to have been constructed by planter who wanted to be able to keep constant tabs on his property and the workers laboring there.

Grace Church and the big plantation houses such as Cobham Park and Tall Oaks attest to the prosperity of the Southwest Mountains region in the last two decades before the Civil War. This prosperity was abruptly reversed by the war, which disrupted the slave-based agricultural system and left much of rural Virginia economically prostrate for the following two decades. As a result, few large or stylish buildings were erected in the district until the late 1880s or 1890s.

While the big plantation owners may have suffered the greatest immediate economic loss, all classes of landowners felt the effects of the depression. Gradually, however, their lot improved, as did that of the newly-freed blacks. Transportation improvements--especially rail--and progressive agricultural practices improved the lot of the average farmer, and families who could heretofore afford only rudimentary houses began building more substantial, usually frame, dwellings.

Beginning in the 1890s the houses of middle-class families in the district were, for the first time, roughly comparable in size to those of the present day. They were also well-built enough to survive to the present in relatively large numbers. The I-house became almost universal among middling farmers. Even some black families could afford two-story houses, as an early dwelling (02-1045; ante 1890) in the unnamed African-American community along Rt. 647 attests.

At the same time, poor families--usually blacks, or white families living on small subsistence-level farms in the mountains--continued to inhabit small one-story, two- or three-room houses. In the Southwest Mountains Historic District, most of those humble houses have disappeared altogether, or have been swallowed up in house enlargements; however, examples remain in other parts of Albemarle County. Log as well as frame dwellings continued to be built well into the twentieth century, especially in the mountain hollows. The present one-room log house on the Norford property (02-1904) is a rare surviving example of this type. Even today, the ruins of dozens of small log houses dot the forested upper reaches of the Southwest Mountains, areas where farming was abandoned early in this century.

At the same time rural families were improving their living quarters, they were also investing time, labor and money in their farms. With increased emphasis on mechanized, capital-intensive, scientific farming during the late nineteenth century, farm buildings became larger, more numerous and better built. Log-walled and pole-supported buildings were increasingly

**United States Department of the Interior
National Park Service****National Register of Historic Places
Continuation Sheet**Section number 7 Page 8

supplanted by framed structures resting on solid foundations. Farmers experimented with new barn forms based on published models. With increased emphasis on cattle-raising and dairying, larger, multipurpose structures supplanted the simple farm buildings of the antebellum era. A number of properties in the district retain a representative sample of their late-nineteenth-century farm buildings, including Edgehill, Dovedale, and Keswick Farm. The large plank corncrib at Ben Coolyn is among the earliest of these surviving postbellum structures. Later, in the early twentieth century, even more elaborate farm farm buildings--such as those at Castalia--were erected in the district. Even so, long-proven vernacular forms continued to be built; one example is the twentieth-century log corncrib at the Williams Farm.

The renewed prosperity of the area in the late nineteenth century was especially evident in small crossroads villages and railroad hamlets such as Lindsey, Cobham and Keswick. Country stores sprang up to serve the needs of local farmers. Nearly a dozen of these pre-1940 stores remain in the district. Examples include small, one-story buildings such as the J.C. Harrington General Store at Lindsey, and larger, two-story buildings such as Bells Store at Cobham. Some stores, like the one that houses the U.S. post office at Cobham, continue in use, but others, like the store at Stony Point, stand abandoned and deteriorating. At Seven Oaks (02-1045), a house in the village of Cismont, an unaltered mid- to late-nineteenth-century physician's office stands in the side yard.

The Chesapeake and Ohio Railroad, running along the eastern edge of the district, brought prosperity to the villages of Lindsey, Cobham, Campbell and Keswick. Today, however, only one early railroad depot remains: the brick depot at Keswick. The main, front portion of this handsome building, erected in the early part of this century, remains virtually unaltered, and is today used as a public meeting place. The rear portion of the building appears to date to just before or after the Civil War, making it one of the earliest railroad-related structures in the region.

Churches in the district reflect the same improvement in living conditions evidenced in housing. By far the greatest number of church buildings in the district today date to the late nineteenth and early twentieth century, although in some cases the congregations predate the Civil War. Like the area's dwellings, churches in the Southwest Mountains Historic District are generally plain, rectangular frame buildings. The earlier examples include Liberty Baptist, Preddy Creek Baptist, and Piedmont Christian churches. The earliest unaltered church erected by a black congregation is the original Wildon Grove Baptist Church (02-1268), which still retains its matchboard interior sheathing, plain wooden pews, and kerosene light fixtures. Later, and more heavily altered churches include St. Johns Baptist, Knights Chapel, and Zion Hill Baptist.

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 9

With the establishment of free public education following the Civil War, public schools became focal points in the community; they were particularly important as a social force in black communities. Although no public schools dating from the nineteenth century remain in the district today, several twentieth-century structures are still standing--all but one of them having been converted to other uses. For example, a former two-room schoolhouse in the black community along Rt. 647 now serves as a dwelling. The largest early frame schoolhouse still standing in the district is the abandoned Cismont School, originally a high school for whites. This two-story frame Colonial Revival building features large windows and spacious classrooms, but it has been shuttered since the 1960s. Probably the earliest schoolhouse still standing in the district is the one-room frame structure on the Williams property (02-1845). Another structure, at Maxfield farm, served as the multi-seat privy for a private school run by an Englishman named Money. Stony Point School (02-1160), a multi-room brick building erected in 1935, is the largest and most sophisticated school building standing in the district today. It is distinguished architecturally by its fine cast-concrete Art Deco entry and its diaper-patterned Flemish-bond brickwork defined by glazed headers.

One of the most interesting late nineteenth-century structures in the district--and one that is emblematic of a way of life that came to characterize the region--is the Keswick Hunt Club (02-1034). This club, established in the 1890s to promote foxhunting and other equine pursuits, as well as to provide a social forum for the local gentry, continues to operate to the present day. The clubhouse itself, erected in 1898 in a semi-rustic variant of the Queen Anne style, is a one-story frame structure with sweeping hipped roof and oversize dormers. It remains virtually unaltered inside, featuring dark-stained matchboard sheathing, a vast stone fireplace, and a stage for performances. On the low flat ground below the clubhouse are the show rings and stables that continue to be used for seasonal steeplechase events.

The Keswick Hunt Club catered to a group of wealthy landowners, many of them recently arrived from Richmond, Washington, or large cities in the Northeast and Midwest. These people bought up old plantations and turned them into horse and cattle farms, settling into the life of gentleman farmers. Edward Mead describes this set of fashionable landowners in his 1899 book Homes of the Southwest Mountains. Among the earliest of the grand houses remaining from this era is the mansion at Merrie Mill Farm, expanded by John Armstrong Chandler around the turn of the century. Another, even larger house was Castalia, a rambling Queen Anne pile erected in the 1890s by the Boocock family of Richmond. Recently judged as too large and expensive to maintain, this house was demolished in 1988 to make way for a smaller residence on the same site.

The greatest era of country-house building in the Southwest Mountains Historic District was the

National Park Service

National Register of Historic Places Continuation Sheet

Section number 7 Page 10

period between 1905 and 1930. Dozens of older farm houses were enlarged or rebuilt, often under the guidance of fashionable architects. Among these were the houses at Windsor, Happy Creek, Eldon Farm, Cismont Manor, Blue Cedar, Little Mountain, St. Margarets, and Little Virginia.

The Georgian Revival and Colonial Revival were the most popular styles in the district, being exemplified by the pretentious mansion Edgewood (02-900), designed in 1911 by Washington, D.C. society architect Waddy Wood. Edgewood features a five-bay, two-and-a-half-story central core flanked by two-story wings with arcaded fronts. A monumental Corinthian portico provides a focal point to the long facade, and an rear service courtyard features a carriagehouse adjoining a handsome two-story water tower articulated with blind arches.

Styles besides the Classical and Georgian revivals were employed in the district on rare occasions. Examples include the Mediterranean style Villa Crawford (02-941) at Keswick, and the sprawling Norman style stone mansion Harkaway (02-901), near Cismont. A few architect-designed buildings other than residences rose in the district in the early part of this century. One example is the handsome stone stable complex at Castalia, designed in a rustic English style by Emierto Capellino. Another is All Saints Episcopal Chapel at Stony Point, designed in 1926 by Stanislaw Makielski, a professor of architecture at the University of Virginia. This diminutive frame building draws on English vernacular prototypes, featuring a picturesque stone chimney, vertical-board siding, grouped casement windows, and jerkin-head roof.

During the early decades of this century, middle-class families also built houses embodying nationally popular styles, albeit on a more modest scale. Good examples of turn-of-the-century late-Victorian houses stand in the village of Cismont, and include Dargaavle (02-1063) and Sharondale (02-462), decorated with stock ornamental brackets and friezes no doubt shipped in by rail from some city factory. Various popular house types, including Craftsman-style, Bungalow, and Foursquare reflected the aesthetic principles of simplicity of form and decoration and domestic comfort as well as the more modest economies of some residents. Although these styles were more popular in towns and urban communities, they are found throughout the Southwest Mountains Historic District. A good example is Music Hall (02-1686), a large story-and-half bungalow with sweeping front porch, porte-cochere, and mixed shingle and stucco cladding.

During the prosperous late nineteenth and early twentieth centuries, small villages developed in the area, including Cismont and Cobham. Cismont includes part of Route 640 just east and west of Route 231, and features a collection of late-nineteenth-century I-Houses and early-twentieth-century bungalows and vernacular dwellings. Cobham, however, was a product of the

United States Department of the Interior
National Park Service

**National Register of Historic Places
Continuation Sheet**

Section number 7 Page 11

postbellum increase in rail traffic; at one time it was a busy village with a depot, store, post office, modest dwellings, and several large estates including Cobham Park (02-153).

The late nineteenth and early twentieth centuries also witnessed the growth of African-American communities in the region. These neighborhoods typically feature small vernacular dwellings. One such community is located along Route 647 off Route 22 and contains a range of modest twentieth-century houses. The most popular house type found along this road is the one-story, four-bay, gable-roofed dwelling of wood-frame or concrete-block construction. Several have later rear and side additions, but many remain unaltered. The Burnett House (02-1046), a large house for this road, is a circa 1880, two-story, five-bay, vernacular dwelling with front veranda and rear I-House unit. Another house on Rt. 647 (02-1047), a circa 1934 bungalow with additions, is a more stylish example of domestic architecture in the district.

Another area traditionally inhabited by African-Americans lies along the northern edge of Route 640, just east of Route 231. St. John Baptist Church (02-943), a vernacular turn-of-the-century church, serves as the spiritual center of the community. The modest church features a projecting front vestibule and narrow tower, and remains relatively unaltered. Just east of the church stands a house (2-1056) which was originally built as a school for black children. This one-story, frame building has a projecting bay with tripartite windows. Just east of the school stands the two-story Odd Fellows Hall (02-1057), which recently was renovated into a dwelling. This building served as a community meeting hall for the Odd Fellows, a service group related to the Masons.

The Southwest Mountains Historic District retains considerable landscape integrity. Routes 22 and 231, a road network in use since the period of early settlement, are lined with large cedars and mixed hardwoods and bordered by deep grass-covered culverts. Although paved and widened and straightened in places, by and large the road networks have remained unchanged since the eighteenth century. These roads follow the area's natural ridges, and tree-lined private entrances to the big plantations extend the characteristic circulation pattern of these historic roads to the historic cores of many properties. Remnants of hedgerows that at one time divided fields and property lines are visible from the main roads; some of these field and property lines are defined by wood-rail fences. Owing to the small amount of recent development in the district, views from the main transportation routes to the mountain ridge and many historic farm complexes have been preserved.

The nature of open land has changed, however. Tobacco, wheat, and other crops were cultivated throughout the first one hundred years of the Southwest Mountains area's development, while today livestock, primarily cattle and horses, graze the open fields. An

**United States Department of the Interior
National Park Service****National Register of Historic Places
Continuation Sheet**Section number 7 Page 12

evolution in architecture accompanied this agricultural change as estates developed where more modest farmhouses once stood. Castalia, for example, was enlarged greatly in the 1880s and 1890s. Its antebellum barns once used to store tobacco, crops or feed stuffs were replaced by larger structures containing separate stall, feed, and equipment areas. Grand, curving, tree-lined drives became a noted characteristic of the new estates. Cedars line the drive at Castle Hill and maples run along Eldon Farm's (02-1432) entrance. Linden Lane (2-1832-50), an early twentieth century estate, was named for its entryway, once a nineteenth-century farm road.

Other landscape features gave their names to many estates. Tall Oaks (02-72), built several years prior to the Civil War, still displays many of the original oaks on its front lawn. This frequently-employed house setting features a main house situated on a rise, surrounded by large deciduous trees, commanding mountain views across rolling, well-kept pastures. Other prominent estates such as Edgeworth, Kinloch, Castalia and Ben Coolyn also shared this type of rural, park-like setting. Natural features such as forested areas and streams often were used to enhance the inherent beauty of a site. The cemetery at Castalia was sited under a shady grove.

Formal gardens increased in popularity in the early twentieth century. A garden containing walks and beds bordered by English boxwood and designed by the Olmsted Brothers for Cobham Park (02-153) has been preserved in its original form. Kinloch boasts a 1940s English garden surrounded by a brick wall. Large English boxwoods line the entry walk to the front of the house. A notable early twentieth-century garden exists at Castle Hill, featuring parterres, garden sculpture, and boxwood hedges.

The Southwest Mountains Rural Historic District contains historic buildings and structures on numerous parcels that are linked by a pastoral landscape. The rural quality of the landscape perhaps contributes as much to the historical integrity of the area as the historic buildings. Remarkably, this rural landscape so near Charlottesville has escaped intensive land development. The district does contain, however, a number of noncontributing buildings and structures, especially late twentieth-century suburban-type houses on both large and small parcels, together with their auxiliary buildings.

7. INVENTORY OF ARCHITECTURAL RESOURCES, Southwest Mountains HD

NOTE: The architectural inventory is paginated separately from the rest of Section 7; its page numbers begin with the letter I (for Inventory). For example, page I-25 would be the 25th page of the inventory.

NOTES ON FORMAT AND ORGANIZATION OF INVENTORY:

Properties are organized by roads, and are keyed to the map in regular order. Each road is assigned a separate prefix number.

For the east side of the mountain ridgeline **contributing and noncontributing properties are listed together**. For the west side of the mountain ridgeline **contributing properties are listed first**, noncontributing properties last. Here, different formats were adopted by the two organizations that produced the inventory.

The **first number** in each inventory entry is the number assigned for the purposes of the Southwest Mountains NRHP report, so that properties can be easily located on the accompanying map. The **second number** is the Department of Historic Resources (DHR) file number.

ROAD KEY

Each of the following letters corresponds to a road segment in the district. These prefixes are used to relate all properties in the district to accompanying inventory maps.

East side of mountain ridge

- A Rt. 231 (south from the Orange County line)
- B Rt. 22 (from Cismont south to Cloverfields)
- D Rt. 646 (north from intersection with Rt. 608 to the Orange County line)
- E Rt. 608 (from Rt. 646 west to Rt. 645)
- F Rt. 645 (Barboursville Quad and Keswick Quad)
- H Rt. 640 (from Rt. 231 northwest to ridge of mountains)
- I Rt. 640 (south from Rt. 231)
- J Rt. 783 (southeast of Rt. 231)
- K Rt. 600 (northwest from Rt. 231 at Cismont)
- L Rt. 600 (southeast from Rt. 231 at Cismont)
- M Rt. 647 (south from Cismont)
- N Rt. 616 (south from Rt. 22 at Keswick)
- O Rt. 731 (southwest from Keswick)
- P Rt. 250 (southeast from Charlottesville)

Stable. Wood frame; 1-story; utilitarian agricultural building; late 19th or early 20th century. Contributing building.

⁵⁸⁸
#B34 (2-1852) Ben Coolyn Corn House, Rt. 22

Granary. Log (squared chestnut); 1-story; 3-bay (symmetrical); side gable roof; unusual small windows with sliding shutters flank central front entrance; gable-roofed central front dormer (loading door); stone piers; double pen with central passage; Vernacular agricultural building is one of largest and best-built log corncribs in county; ca. 1850. Contributing building.

#B35 (2-162) South Plains Church, Rt. 22

Church. Brick; 1-story; 1-bay; front gable roof; front-gabled entrance vestibule with pointed-arched door opening; lancet windows; Gothic Revival-style detailing on a traditional Vernacular form; ca. 1820. Contributing building.

Cemetery. Cemetery with stone gravestones and obelisks; mid-19th century. Contributing site.

#B36 (2-1971) House, Rt. 22

Dwelling. Wood frame; 2-story; 3-bay (symmetrical); hipped roof; 1-story (5-bay) hip-roofed front porch with Tuscan columns; interior brick chimney; exterior brick end chimney; 2-story rear ell; Greek Revival-style residence; mid-19th century. Contributing building.

Garage. Prefabricated metal; 1-story; 4-bay (asymmetrical); side gable roof; utilitarian outbuilding; late 20th century. Noncontributing building.

Vehicle Shed. Wood frame; 1-story; shed roof; utilitarian outbuilding; early 20th century. Contributing building.

Small Stable/Shed. Wood frame; 1-story; utilitarian outbuilding; 19th or 20th century. Contributing building.

#B37 (2-1972) House, Rt. 22

Dwelling. Wood frame; 2-story; 5-bay main block; side gable roof; 1 1/2-story side wing with gabled front dormers; 1-story (3-bay) hip-roofed front porch; exterior brick end chimney on main block; exterior brick end chimney on side wing; Neo-Georgian residence; mid- to late 20th century. Noncontributing building.

Shed/Hen House. Wood frame; 1-story; side gable roof; utilitarian agricultural building; early 20th century. Contributing building.

#B38 (2-23) East Belmont, Rt. 22

Dwelling #1. Brick front portion; wood-frame rear portion; 2-story plus attic; 5-bay (symmetrical); side gable roof; 1-story (hip-roofed) partially enclosed 5-bay side porch; 2-story (cross-gabled) rear ell with 1-story (shed-roofed) gable-end addition; T-plan (cross-gabled) wing on rear ell; 2-story (2-level) front porch with a cross-gabled roof featuring paneled square columns, balustrades on each level, and a pediment with an oculus; 1-story (3-bay) glazed rear porch with roof balustrade; two interior brick chimneys; Federal-style residence; wood-frame portion apparently built around 1811 on foundation of older structure; brick portion added around 1825. Contributing building.

Dwelling #2 (Farm Manager's House). Stone and wood frame; 2-story; 3-bay main block; gable roof; 1-story gable-end wing with clipped-gable roof and interior brick chimney; central brick chimney; Traditional split-level residence; late 20th century. Noncontributing building.

Dwelling #3. Poured concrete; 2-story; 3-bay (asymmetrical); side gable roof; 1-story (2-bay) shed-roofed front porch; two interior brick end chimneys; Vernacular tenant house; early to mid-20th century. Contributing building.

Pool. Concrete; flag-stone deck with brick edging; early to mid-20th century. Contributing structure.

Pump House/Shed. Wood frame; 1-story; 1-bay; octagonal plan; ogee-curved hipped roof with finial; elliptical traceried windows on side elevations; Colonial Revival outbuilding; early to mid-20th century. Contributing building.

Pool House. Wood frame; 1 1/2-story; 2-bay; front gable roof; clipped gable on rear; interior brick chimney; Colonial Revival outbuilding; early 20th century. Contributing building.

Garage. Wood frame; 1 1/2-story; 3-bay (asymmetrical); side gable roof; front dormer with projecting clipped-gable roof; projecting roof-hood on gable end; Colonial Revival outbuilding; early 20th century. Contributing building.

Well. Wood frame well cover with pyramidal hipped roof; Colonial Revival influenced; early to mid-20th century. Contributing structure.

Stone Chimney. Random rubble chimney with brick stack; firebox occurs halfway up chimney; steel I-beam lintel over firebox; steel I-beam at base of chimney; perhaps chimney remains from previously standing structure; late 19th or early 20th century. Contributing structure.

Stable #1. Wood frame; 2-story front-gabled central section; 1-bay; flanking shed-roofed side wings; Vernacular agricultural building; early 20th century. Contributing building.

Stable #2. Long wood-frame building; 1 1/2-story; 3-bay (asymmetrical); front gable roof; with shed-roofed clerestory on roof; utilitarian agricultural building; early 20th century. Contributing building.

Vehicle Shed #1. Metal; 1-story; utilitarian agricultural building; late 20th century. Noncontributing building.

Stable #3. Wood frame; 1-story; 1-bay; front gable roof; rectangular vent on gable end; utilitarian agricultural building; early to mid-20th century. Contributing building.

Barn #1. Stone (first story) and wood frame; 1 1/2-story; 1-bay; front gable roof; Vernacular agricultural building; 19th or early 20th century. Contributing building.

Silo #1. Metal; ladder on side; utilitarian agricultural structure; mid-20th century. Noncontributing structure.

Silo #2. Metal; ladder on side; utilitarian agricultural structure; mid-20th century. Noncontributing structure.

Barn #2. Wood frame; 2 1/2-story; 2-bay; gambrel roof; projecting roof hoods on each end; Vernacular agricultural building; early 20th century. Contributing building.

Silo #3. Concrete block; utilitarian agricultural structure; early 20th century. Contributing structure.

Shed. Wood frame; 1-story; gable roof; utilitarian agricultural building; early 20th century. Contributing building.

Chicken House. Wood frame; 1-story; shed roof; utilitarian agricultural building; early 20th century. Contributing building.

Vehicle Shed #2. Wood frame; 1-story; gable roof; utilitarian agricultural building; early 20th century. Contributing building.

#B39 (2-1029) Wagon Wheels, Rt. 22

Dwelling. Stone (random rubble); 1 1/2-story; 5-bay (asymmetrical); cross gable roof (H-shaped plan); half-timbered front elevation; recessed rear porch; central stone chimney; rare example in Albemarle County of Vernacular English Tudor Revival-style cottage; ca. 1930. Contributing building.

Garage. Stone (random rubble); 1 1/2-story; 3-bay (symmetrical); side gable roof; shed-roofed (wood-frame) dormer; central stone chimney; English Vernacular Revival-style outbuilding; ca. 1930. Contributing building.

Kennel. Concrete block; 1-story; 5-bay (symmetrical); side gable roof; two metal vents on roof; fenced dog runs; utilitarian agricultural building; mid-20th century. Noncontributing building.

Barn. Wood frame; 1 1/2-story; 3-bay (asymmetrical); gambrel roof with projecting roof hoods; two gabled dormers with rectangular vents; wood-frame octagonal vent with octagonal hipped roof on roof ridge; Vernacular agricultural building; early 20th century. Contributing building.

#B40 (2-1973) Rectory for South Plains Church, Rt. 22

Dwelling. Wood frame; 2-story; 3-bay (symmetrical); hipped roof; 5-bay (symmetrical) hip-roofed front porch with turned columns and a balustrade; 2-bay (shed-roofed) rear porch; brick foundation; two interior brick chimneys; Vernacular antebellum residence; mid-19th century. Contributing building.

Garage. Wood frame; 1-story (open bay); 1-bay; front gable roof; utilitarian outbuilding; early 20th century. Contributing building.

(2-1832-103) House, Rt. 22

Dwelling. Wood frame with stucco cladding; 1-story; 4-bays (asymmetrical); side gable roof; projecting cross-gabled wings on front; projecting gable-roofed (1-bay) front porch; modified Ranch; mid-20th century. Noncontributing building.

Garage/Office. Wood frame with stucco cladding; 1-story; 3-bay (asymmetrical); side gable roof; central brick chimney; utilitarian outbuilding; mid-20th century. Noncontributing building.

#B41 (2-~~1974~~⁹⁴⁴) U.S. Post Office at Keswick, Rt. 22

Commercial Block. Stuccoed masonry; 1-story; 6-bay (asymmetrical); flat roof with parapet; full-story pilasters with square caps protrude above parapet; shed-roofed hood (terra-cotta tile) over main entry; shed-roofed hood (asphalt shingles) over secondary entry; paved lot in front; Mission Revival-influenced commercial block; early 20th century. Contributing building.

(2-1037) Keswick Depot No. 2, Rt. 22

Railroad Depot. Concrete block; 1-story; 4-bay (asymmetrical); side gable roof; central brick chimney; Colonial Revival-style detailing; ca. 1940s. Noncontributing building.

Railroad Yard. Dirt yard surrounded by chain-link fence; on corner of road adjacent to railroad tracks; mid-20th century. Noncontributing site.

Shed #1. Concrete block; 1-story; 1-bay; shed roof; utilitarian building; mid-20th century. Noncontributing building.

Shed #2. Prefabricated metal shed; 1-story; gable roof; utilitarian building; mid- to late 20th century. Noncontributing building.

#B42 (2-1975) House, Rt. 22

Dwelling. Brick (weatherboard cladding on side and rear elevations); 1-story (split-level) with raised basement; 4-bay (asymmetrical); side gable roof; 2-story (1-level) shed-roofed front veranda (4-bay) with square columns on brick plinths; large bay window on front elevation; exterior brick end chimney; interior brick chimney; Traditional split-level residence; late 20th century. Noncontributing building.

Silo. Wood frame; 1-story; pyramidal roof; elliptical plan; utilitarian agricultural building; 19th or early 20th century. Contributing building.

Barn #2. Wood frame; 1 1/2-story; 2-bay (asymmetrical); gambrel roof with projecting roof hood; Vernacular agricultural building; late 19th or early 20th century. Contributing building.

Barn #3. Wood frame with stone (random rubble) first story; 2 1/2-story; front gable roof; long wood-frame gable-roofed vent on roof ridge; Vernacular agricultural building; late 19th or early 20th century. Contributing building.

#F5 (2-1959) Happy Creek (newer residence), Rt. 645

Dwelling. Wood frame; 1 1/2-story; 3-bay (symmetrical) main block; side gable roof; half-height second-story windows; flanking 1 1/2-story wings; 1-story hyphen to side wing; three interior brick chimneys; exterior brick end chimney; Colonial Revival-style residence; early to mid-20th century. Contributing building.

Tennis Court. Concrete-slab tennis court; early to mid-20th century. Contributing structure.

Pool. Concrete pool; early to mid-20th century. Contributing structure.

Pool House. Concrete-block; 1-story; temple-like columned portico; Neoclassical-style outbuilding; early 20th century. Contributing building.

#F6 (2-1980) Carter House, Rt. 645

Dwelling. Wood frame; 1-story; 3-bay (asymmetrical); side gable roof; 3-bay (shed-roofed) front porch; wooden ramp between grade and front porch; central brick chimney; Vernacular residence; early to mid-20th century. Contributing building.

Shed #1. Wood frame; 1-story; 3-bay (asymmetrical); shed roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Shed #2. Wood frame; 1-story (half-height); 1-bay; flat roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Shed #3. Wood frame; 1-story; 3-bay (symmetrical); side gable roof; shed-roofed lean-to side wing; utilitarian outbuilding; early to mid-20th century. Contributing building.

Chicken House. Wood frame; 1-story; two shed-roofed sections connected back-to-back along longitudinal axis; utilitarian agricultural building; early to mid-20th century. Contributing building.

Animal Shelter. Wood frame; 1-story; 3-bay (open bay); shed roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Barn. Wood frame; 1-story; 1-bay; front gable roof; 1-bay (open bay) wing; utilitarian agricultural building; early to mid-20th century. Contributing building.

(2-1832-112) House, Rt. 645

Dwelling. Wood frame; 1 1/2-story (raised poured-concrete basement); 4-bay (asymmetrical); side gable roof; wooden front steps and landing with balustrade; Neocolonial residence; late 20th century. Noncontributing building.

Goat House. Wood frame (plywood siding); 1-bay; side gable roof; utilitarian agricultural building; late 20th century. Noncontributing building.

Shed. Wood frame; 1-story; 1-bay; front gable roof; utilitarian outbuilding; late 20th century. Noncontributing building.

#F7 (~~2-1981~~) House, Rt. 645

Dwelling. Wood frame; 1-story; 3-bay (symmetrical); side gable roof; 1-bay portico with square Tuscan columns supporting round-arched pediment; interior brick end chimney; Bungalow; 1933. Contributing building.

Barn. Wood frame; 1-story; 4-bay (asymmetrical); front gable roof; double corn house with two corn cribs (originally designed for wagon to drive through center); utilitarian agricultural building; early 20th century. Contributing building.

Garage. Wood frame; 1-story; 3-bay (asymmetrical); shed-roofed open bay garage with attached front-gabled shed; utilitarian outbuilding; early 20th century. Contributing building.

Storage Building. Wood frame; 1-story; 1-bay; front gable roof; utilitarian outbuilding; early 20th century. Contributing building.

#F8 (2-1060) Logan, Rt. 645

Dwelling (vacant). Brick; 2-story; 3-bay; side gable roof; central passage; T-plan with cross-gabled (side-passage) rear wing; small 1-story wood-frame addition at rear; front porch collapsed; two interior brick end chimneys; antebellum I-house; traditional date is ca. 1836 but architectural evidence suggests a later 19th-century date. Contributing building.

Garage. Wood frame with metal siding and concrete-block foundation; 3-bay (asymmetrical); side gable roof; utilitarian outbuilding; mid-20th century. Noncontributing building.

Shed. Wood frame; 1-story; 1-bay; front gable roof; utilitarian outbuilding; 19th or early 20th century. Contributing building.

Barn/Stable (ruined). Wood frame; long 1-story building; side gable roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Corn House. Wood frame with wire-mesh sides; 1-story; shed roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

#F9 (2-1982) Hoffman House, Rt. 645

Dwelling. Wood frame; 1-story; 3-bay (symmetrical); hipped roof; 3-bay pedimented portico with Tuscan columns on brick plinths; interior brick chimney; Bungalow; early 20th century. Contributing building.

School/Dwelling. Wood frame; 3-bay (asymmetrical); side gable roof; central brick flue; Vernacular rural school or dwelling; late 19th or early 20th century. Contributing building.

Shed #1. Wood frame; 1-story; 1-bay; shed roof; utilitarian outbuilding; early 20th century. Contributing building.

Shed #2. Wood frame; 1-story; 1-bay; shed roof; utilitarian outbuilding; early 20th century. Contributing building.

Rabbit Hutch. Wood frame hutch; utilitarian structure; mid- to late 20th century. Noncontributing structure.

Shed #3. Wood frame; 1-story; 1-bay; front gable roof; utilitarian outbuilding; early 20th century. Contributing building.

Shed #4. Wood frame; 1-story; gable roof with overhang; utilitarian outbuilding; early 20th century. Contributing building.

Barn. Wood frame; 1 1/2-story; 1-bay; front gable roof; open-bay shed-roofed side wing; utilitarian agricultural building; early 20th century.

Quonset Hut. Metal; utilitarian agricultural building; mid-20th century. Noncontributing building.

Office. Wood frame; 1-story; 6-bay (symmetrical); side gable roof; Neocolonial outbuilding; late 20th century. Noncontributing building.

Corral. Wood frame; enclosed round corral; low conical roof with central octagonal roof vent; utilitarian agricultural building; mid- to late 20th century. Noncontributing building.

Large Stable #1. Wood frame; 1-story; cross gable roof; L-shaped plan; rear shed-roofed porch; utilitarian agricultural building; mid- to late 20th century. Noncontributing building.

Large Stable #2. Wood frame; 1-story; multi-bay facade with large central entrance; side gable roof; utilitarian agricultural outbuilding; mid- to late 20th century. Noncontributing building.

Storage Shed. Wood frame; 1-story; 1-bay; front gable roof; utilitarian outbuilding; mid-20th century. Noncontributing building.

Chicken House. Wood frame; 1-story; 1-bay; front gable roof; utilitarian agricultural building; mid-20th century. Noncontributing building.

#13 (2-943) St. Johns Baptist Church, Rt. 640

Church. Wood frame; 1-story; 1-bay (symmetrical); 4-bay (side elevations); square, central-front 3-tier hip-roofed tower with double-door entrance vestibule; pedimented front gable roof; 1-bay gable-roofed side wing; fluted corner boards; interior brick flue; largely unaltered, the late Greek Revival-style church is one of the earlier African American churches established in Albemarle County; ca. 1890. Contributing building.

Cemetery. Late 19th-century cemetery at rear of church. Contributing site.

#14 (2-1056) School, Rt. 640

School. Wood frame (brick foundation); 1-story; side gable roof with central cross gable; 6-bay (asymmetrical); rear shed-roofed ell; two concrete-block flues; Vernacular school building is one of few early 20th-century African American schoolhouses standing in Albemarle County; ca. 1910. Contributing building.

Shed. Wood frame; 1-story; 1-bay; front gable roof; rear shed-roofed addition; utilitarian outbuilding; early 20th century. Contributing building.

#15 (2-1057) Odd Fellows Hall, Rt. 640

Dwelling/Store. Wood frame (stucco); 2-story; 2-bay (asymmetrical); side gable roof; aluminum hood over front door; front deck; rear deck; original 1-bay gable-end front altered when entrance moved to side elevation; Vernacular store/dwelling; ca. 1900; converted to dwelling late 1980s. Contributing building.

(2-1832-158) House, Rt. 640 (refused survey)

Dwelling. Brick; 1-story; 5-bay (asymmetrical); gable roof; Ranch; mid- to late 20th century. Noncontributing building.

#16 (2-1058) House, Rt. 640

Dwelling. Wood frame; 2-story; 2-bay (asymmetrical); low hipped roof; 1-story (3-bay) hip-roofed front porch with turned posts; large 2-story rear addition; 2-story (1-bay) shed-roofed rear addition with 1-story screened side porch; central brick chimney; exterior brick chimney on side elevation; Victorian Vernacular residence; late 19th century. Contributing building.

Garage. Concrete block; 1-story; 2-bay; front gable roof; utilitarian outbuilding; mid-20th century. Noncontributing building.

Dwelling. Brick (vinyl siding on part of front and side elevations); 1-story (raised basement); 4-bay (asymmetrical); side gable roof; 1-bay front porch under roof overhang; exterior brick end chimney; interior brick flue; metal roof vent; Traditional split-level residence; ca. 1976. Noncontributing building.

Garage. Wood frame; 1-story; 2-bay; gable roof; utilitarian outbuilding; late 20th century. Noncontributing building.

Barn. Wood frame; 1-story; utilitarian outbuilding; 20th century. Noncontributing building.

(2-1832-144) House, Rt. 600

Dwelling. Brick; 1-story (raised basement); 4-bay (asymmetrical); side gable roof; 1-bay pedimented front porch; side deck; exterior brick end chimney; Traditional split-level residence; 1978. Noncontributing building.

Garage. Wood frame; 1-story; 2-bay; gable roof; utilitarian outbuilding; late 20th century. Noncontributing building.

(2-1832-145) House, Rt. 600

Dwelling. Brick; 1-story (raised basement); 4-bay (asymmetrical); side gable roof; 3-bay pedimented front porch with balustrade; exterior brick end chimney; interior brick flue; Traditional split-level residence; 1980. Noncontributing building.

Garage/Shed. Wood frame; 1 1/2-story; gable roof; two dormers; utilitarian outbuilding; late 20th century. Noncontributing building.

(2-1832-146) House, Rt. 600

Dwelling. Brick (vinyl siding on part of front and side elevations); 1-story (raised basement); 5-bay (asymmetrical); side gable roof; exterior brick end chimney; metal attic vent; Traditional split-level residence; 1978. Noncontributing building.

(2-1832-147) Honeywood, Rt. 600

Dwelling. Wood frame; 1 1/2-story; 5-bay (asymmetrical); front gable roof; front bay window; 1-story (1-bay) hip-roofed front porch supported on one corner by bay window; shed-roofed hood over side entry; side deck; interior concrete-block flue; Neo-Vernacular Rustic-type residence; 1982. Noncontributing building.

Shed. Wood frame; 1 1/2-story; 1-bay; side gable roof; shed-roofed hood over entry; Neo-Vernacular Rustic-type outbuilding; ca. 1982. Noncontributing building.

#K7 (2-1832-148) Sandalwood, Rt. 600

Hunting Lodge/Dwelling. Concrete block; 1-story (raised basement); 4-bay (asymmetrical); side gable roof; 4-bay front veranda under roof overhang with Tuscan columns and balustrade; exterior 2-story staircase down to basement at end of veranda; Neo-Vernacular lodge later renovated for residence; ca. 1965. Noncontributing building.

Office. Wood frame with stone (random-rubble) raised basement; 1-story; 1-bay; front gable roof; wood staircase from grade to first-story wrap-around deck; interior metal flue; Contemporary Rustic-type outbuilding; late 20th century. Noncontributing building.

Pumphouse. Concrete block; 1-story; 1-bay; front gable roof; utilitarian outbuilding; late 20th century. Noncontributing building.

Greenhouse. Utilitarian outbuilding; late 20th century. Noncontributing building.

Old Farmhouse site. Stone (random rubble) foundation; 19th or early 20th century. Contributing site.
Spring. Stone wall near natural spring; 19th or early 20th century. Contributing site.
Stone Water Dam. Small stone dam; 19th or 20th century. Contributing structure.

#K8 (2-2001) House, Rt. 600 (possibly slave quarters for Rougemont Site or Merifields)

Dwelling (ruined). Wood frame (random-rubble piers and cellar); split and vertical-sawn construction with mud and horsehair mortar; forged nails; 1 1/2-story; 2-bay; side gable roof; gable-roofed 1-story gable-end addition projects forward at right angle from main block; exterior random-rubble chimney with brick stack; exterior brick end chimney; Vernacular slave quarters or tenant house; mid- to late 19th century. Contributing building.

#K9 (2-2002) Cedarcroft, Rt. 600

Dwelling. Wood frame; 2-story; 3-bay (symmetrical); side gable roof; Tuscan frontispiece with broken pediment; first-story windows have Tuscan entablatures; 1-story screened side porch with roof balustrade; exterior brick end chimney; Colonial Revival-style residence; 1932. Contributing building.

Cottage. Wood frame; 1-story; gable roof; small American Folk-type rural cottage; late 20th century. Noncontributing building.

Garage. Wood frame; 1-story; gable roof; utilitarian outbuilding; mid- to late 20th century. Noncontributing building.

#K10 (2-2003) House, Rt. 600

Dwelling. Wood frame; 2-story; 4-bay (asymmetrical); front gable roof; bracketed cornice; 2-story (cross-gabled) side wing; 2-story bay window on outer bay of front elevation; 1-story (3-bay) front porch with turned columns; two interior brick chimneys; Vernacular Victorian residence; ca. 1900. Contributing building.

Gazebo. Wood frame (screened); 1-story; pyramidal hipped roof; Neo-Victorian gazebo; mid- to late 20th century. Noncontributing building.

Rt. 600 (southwest from Rt. 231 at Cismont)**#L1 (2-1063) Dargavle, Rt. 600**

Dwelling. Wood frame; 2-story; 2-bay (asymmetrical); cross gable roof; 1-story (3-bay) front porch featuring turned columns with scrolled brackets; screened side porch; rear 1-story ell with enclosed (screened) porte-cochere on end; side entrance with urns on plinths flanking wood steps, and shed-roofed hood over French doors; central brick chimney; Vernacular Victorian residence; ca. 1890. Contributing building.

Shed. Wood frame; 1-story; utilitarian outbuilding; late 19th or early 20th century. Contributing building.

(2-1066) Stone-Robinson Garage, Rt. 600*

Garage. Concrete block; 2-story; 1 large garage bay; front gable roof; two concrete-block wall buttresses on side elevation; exterior concrete-block flue; side entry; utilitarian garage/workshop; mid-20th century.

Noncontributing building.

United States Department of the Interior
National Park ServiceNational Register of Historic Places
Continuation SheetSection number 7 Page I-62**#L2 (2-462) Sharondale, Rt. 600**

Dwelling. Wood frame (brick foundation); 2-story; 3-bay (symmetrical); low-pitched side gable roof; central front gable; 2-story (2-level) 3-bay front porch; bay windows on outer bays of first story; bracketed cornice (scrolled brackets); exterior brick end chimneys; rear 2-story ell; 2-story side wing on ell; Vernacular Victorian I-house; ca. 1870. Contributing building.

Garage. Wood frame; 1-story; 2-bay (symmetrical); front gable roof; utilitarian outbuilding; mid-20th century. Noncontributing building.

Summer Kitchen. Wood frame; 1-story; 1-bay; front gable roof; Vernacular outbuilding; late 19th or early 20th century. Contributing building.

Shed. Wood frame; 1-story; utilitarian outbuilding; late 19th or early 20th century. Contributing building.

Pump House. Concrete block; 1-story; utilitarian outbuilding; mid-20th century. Noncontributing building.

#L3 (2-409) Tuck House, Rt. 600

Dwelling. Log and wood frame (original 1-room hall-passage house now incorporated into larger dwelling); 1 1/2-story; 3-bay (symmetrical); side gable roof (main block); two front (shed-roofed) dormers; 1-story (3-bay) hip-roofed front porch; central stone chimney (originally end chimney); original log dwelling enlarged one bay to form present main block; 2-story rear addition with modified gable roof; 1 1/2-story ell on rear addition; antebellum Vernacular residence; late 18th or early 19th century (log section); 19th- and early 20th-century additions. Contributing building.

Vehicle Shed (under construction). Wood frame; 1-story; utilitarian outbuilding; late 20th century. Noncontributing building.

#L4 (2-2004) House, Rt. 600

Dwelling. Stucco; 1 1/2-story; 3-bay (symmetrical); gable roof; large 2-story rear addition with second-story screened porch (covered walkway connects rear addition to garage and office); Bungalow; 1920s. Contributing building.

Garage (partially collapsed). Wood frame (connected at rear to office); 1-story; 1-bay; front gable roof; utilitarian outbuilding; early 20th century. Contributing building.

Office. Wood frame (connected at rear to garage); 1-story; 1-bay; front gable roof; interior brick flue; utilitarian outbuilding; early 20th century. Contributing building.

Shed #1. Concrete block; 1-story; utilitarian outbuilding; mid-20th century. Noncontributing building.

Shed #2. Concrete block; 1-story; utilitarian outbuilding; mid-20th century. Noncontributing building.

Shed #3. Concrete block; 1-story; utilitarian outbuilding; mid-20th century. Noncontributing building.

Guest Cottage. Wood frame and concrete block; 1-story; 1-bay (sliding glass doors); side gable roof; interior metal flue; possibly utilitarian outbuilding converted to American Folk-type cottage; mid-20th century. Noncontributing building.

#L5 (2-463) Johnson-Wilcox House (The Partridge), Rt. 600

Dwelling. Wood frame; 2-story; 3-bay (symmetrical); side gable roof; central front gable; 2-story (1-level) 3-bay pedimented front porch with square colossal columns; two exterior brick end chimneys; rear 2-story ell with a screened porch on the first story; Vernacular I-house with early 20th-century portico addition; ca. 1885. Contributing building.

dormers; shed-roofed gable-end addition; built at Belvoir sometime after ca. 1764; later moved to Milton; moved to Maxfield early 19th century; Federal-style residence; built sometime after ca. 1764 with later modifications. Contributing building.

Tool Shed. Wood frame; 1-story; 1-bay; gable roof; utilitarian outbuilding; early to mid-20th century. Contributing building.

Sheep Kennel. Wood frame; 1-story; 3-bay (symmetrical); front gable roof; ten sheep runs with chain-link fences extend from one side; utilitarian agricultural building; mid- to late 20th century. Noncontributing building.

Smokehouse. Wood frame; 1-story; 1-bay; side gable roof; interior brick flue; stands on later concrete patio; surrounded by wood-plank fence; Vernacular outbuilding; early 20th century. Contributing building.

Cow Shelter. Wood frame; 1-story; shed roof; utilitarian agricultural building; mid-20th century. Noncontributing building.

Vehicle Shed. Wood frame; 1-story; 8-bay; clipped gable roof; utilitarian agricultural building; mid-20th century. Noncontributing building.

Barn/Stable. Wood frame; 1 1/2-story; 3-bay (symmetrical); front gable roof; shed-roofed side addition; utilitarian agricultural building; mid-20th century. Noncontributing building.

Cottage. Wood frame; 1-story; 3-bay (symmetrical); 1-bay (shed-roofed) front porch; small American Folk-type rural cottage; mid-20th century. Noncontributing building.

Pump House. Wood frame; 1-story; 1-bay; gable roof; utilitarian outbuilding; early to mid-20th century. Contributing building.

⁴⁸⁻¹
#M8 (2-1073) Barn at Maxfield, Rt. 647

Barn. Wood frame (heavy timber construction); 1-story over full stone basement; 1-bay; constructed on grade with basement opening at lower end of slope; unusual German-influenced Vernacular agricultural building; late 19th century. Contributing building.

⁴⁸⁻²
#M9 (2-1074) Money Schoolhouse Site and Privy, Rt. 647

School Site. Early 20th-century schoolhouse (demolished after 1967); school closed sometime in the 1920s. Contributing site.

Privy. Wood frame; 1-story; 1-bay; side gable roof; four interior toilet stalls; only privy of its type recorded in central Virginia; Vernacular outbuilding; ca. 1910-1930. Contributing building.

#M10 (2-2007) House, Rt. 647

Dwelling. Wood frame; 2-story; 3-bay (symmetrical) main block; hipped roof; flanking 1-story wings; rear 1-story (5-bay) porch with Tuscan columns and roof balustrade; interior brick end chimney; exterior brick end chimney; rear entry on each flanking wing with wood steps and balustrade; Vernacular residence; late 19th or early 20th century with late 20th century wing additions. Contributing building.

Vehicle Shed. Wood frame; 1-story; 3-bay (open bay); side gable roof; utilitarian outbuilding; early to mid-20th century. Contributing building.

Barn. Wood frame; 1 1/2-story; 3-bay (asymmetrical); side gable roof; pyramidal hip-roofed vent on roof ridge; utilitarian agricultural building; early to mid-20th century. Contributing building.

Stable. Wood frame; 1 1/2-story; 4-bay (open bay); side gable roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

1-story rear ell with hipped roof and interior brick chimney; 2-story rear porch (enclosed on first story); two interior brick chimneys on main block; Italianate residence; ca. 1876 with later additions; library renovated 1960s; kitchen probably added between 1882 and 1895. Contributing building.

Cottage #1. Wood frame (concrete-block foundation); 2-story; 2-bay (asymmetrical); modified side gable roof; 1-story side addition with shed roof and second-story roof deck with balustrade; Vernacular servant's quarters renovated to Neocolonial cottage; late 19th or early to mid-20th century; late 20th-century renovations. Contributing building.

Cottage #2. Wood frame (concrete-block foundation); 1-story; 5-bay (asymmetrical); modified side gable roof; rear leanto addition; side extension addition; decorative dog-tooth shingle siding on gable ends; Vernacular residence; late 19th century with later additions. Contributing building.

Barn. Wood frame; 1 1/2-story; gambrel roof; Vernacular agricultural building; late 19th or early 20th century. Contributing building.

Stable/Barn. Wood frame (concrete-block full basement with stalls); 1-bay; front gable roof; long, rectangular plan; wrap around porch with balustrade forms second-story access deck around front and side of building; 1-story shed-roofed animal shelter forms rear ell; utilitarian agricultural building; late 20th century.

Noncontributing building.

Pool. Concrete pool; mid- to late 20th century. Noncontributing structure.

(2-1832-162) Ormont, Rt. 731

Dwelling. Brick; 2-story; 3-bay (symmetrical) main block; hipped roof; 1-story (1-bay) portico with coupled square columns; 1-story flanking wings; rear addition; three interior brick chimneys (one each on main block and flanking wings); original house on site built ca. 1900; present residence built around the mid-20th century as 1-story Ranch-style house; flanking wings added thirteen years ago and five years ago; upper story added 1990 giving the house a Neo-Georgian appearance. Noncontributing building.

Garage. Wood frame; 1-story; 4-bay (open bays); shed roof; utilitarian outbuilding; ca. 1980.

Noncontributing building.

Barn. Wood frame (concrete-block foundation); 1-story; 2-bay (symmetrical); front gable roof; 3-bay concrete-block (flat-roofed) flanking side wing; utilitarian agricultural building; mid- to late 20th century.

Noncontributing building.

(2-1832-163) House, Rt. 731

Dwelling. Brick; 1-story; 4-bay (asymmetrical); side gable roof; 1-bay shed-roofed front porch; interior brick chimney; garage end bay; Traditional Ranch; mid- to late 20th century. Noncontributing building.

#06 (2-941) Villa Crawford, Rt. 731 (photo access denied)

Dwelling. Stucco (hollow-tile construction); 2 1/2-story; 7-bay (symmetrical); hipped roof with modillioned cornice; three front hip-roofed dormers; single side dormers; 1-story front porch with Tuscan columns and roof balustrade; similar side porch; four interior brick end chimneys; 2-story rear wing addition; 1-story side addition; unusual example in Albemarle County of early 20th-century Eclectic architecture combining Georgian Revival and Italian Villa styles and designed by local architect Eugene Bradbury; used as country club during third quarter of 20th century; ca. 1910; later additions and renovations; presently undergoing extensive renovation. Contributing building.

Swimming Pools. Concrete pool; dates from 1940s conversion to country club. Noncontributing structure.

Conservatory. Wood frame; 1-story (raised brick basement); 3-bay (asymmetrical); central front gable; side gable roof with exposed rafter tails; 1-story (1-bay) shed-roofed front porch with square posts and built-in seats; central basement through-passage; rear 5-bay screened porch with square Roman Doric columns and balustrade with repetitive cut-out pattern; exterior brick end chimney; brick pent closet on opposite gable end; Victorian Vernacular dependency; late 19th century. Contributing building.

New Residence. Wood frame; 2-story; 3-bay (symmetrical); hipped roof; frontispiece with single-door entry, simple pediment and sidelights; brick-walled front patio; two exterior brick end chimneys; 1-story (2-bay) hip-roofed rear garage ell connected to main block by 2-bay hyphen; Neo-Georgian residence; mid-20th century. Noncontributing building.

Kitchen. Wood frame (brick foundation); 1-story; 2-bay (asymmetrical); side gable roof with exposed rafter tails; interior brick end chimney; Vernacular outbuilding; late 19th or early 20th century. Contributing building.

Smokehouse. Wood frame (random-rubble stone foundation); 1-story; 1-bay; pyramidal hipped roof (slate); Vernacular outbuilding; late 19th century. Contributing building.

Carriage House. Brick; 1-story; 1-bay; hipped roof (slate) with scrolled rafter tails; interior brick end chimney; original door opening altered for garage bay; late 19th or early 20th century. Contributing building.

Pump House. Brick and poured concrete; 1-story; 1-bay; round vaulted roof; built into hill; utilitarian outbuilding; early 20th century. Contributing building.

Barn #1. Wood frame; 1-story; 2-bay (symmetrical); front gable roof; utilitarian agricultural building; late 19th or early 20th century. Contributing building.

Music House. Wood frame (poured-concrete foundation; shingle siding); 1-story; 2-bay (asymmetrical); side gable roof; interior brick end chimney; utilitarian outbuilding; early 20th century. Contributing building.

Barn #2. Wood frame; 1 1/2-story (raised brick foundation); 5-bay (symmetrical); side gable roof with bracketed eaves; central front gable-roofed dormer; built into slope; rear entrance has earthen ramp; German-influence Vernacular agricultural building; early 20th century with late 20th-century alterations. Contributing building.

Cottage #2. Wood frame (poured-concrete foundation); 1-story; 3-bay (symmetrical); pyramidal hipped roof (slate) with scrolled rafter tails; two interior brick flues; 1-bay shed-roofed front porch with square posts; Bungalow; early 20th century. Contributing building.

Brick Kitchen. Brick; 1-story; 1-bay; pyramidal hipped roof (slate) with scrolled rafter tails; interior brick chimney; Vernacular outbuilding; late 19th century or early 20th century. Contributing building.

Concrete Shed. Concrete block; 1-story; 1-bay; shed roof; surrounded by chain-link fence; perhaps used as kennel; utilitarian outbuilding; mid-20th century. Noncontributing building.

Large Barn. Wood frame; 1 1/2-story; front gable roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Shed. Wood frame; 1-story; 1-bay; shed roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Barn #3. Wood frame; 2-story; 2-bay; front gable roof; shed-roofed side wing; utilitarian agricultural building; early to mid-20th century. Contributing building.

Chicken House. Wood frame; 1-story; 4-bay; shed roof; utilitarian agricultural building; early to mid-20th century. Contributing building.

Silo. Metal silo with domed cap; utilitarian agricultural structure; mid-20th century. Noncontributing structure.

the Virginia plantation legacy that survives in the many large estates and horse farms that still exist in the district. The district provides a visual as well as historical linkage with the agricultural society that played a vital role in the lives of the two former presidents and their neighbors and political associates.

JUSTIFICATION OF CRITERIA

The Southwest Mountains Rural Historic District is eligible for inclusion on the National Register of Historic Places under criteria A, B, C, and D. The district is eligible under criterion A because of its associations with the westward migration of the Virginia frontier and its contributions to significant trends in agricultural, transportation, and cultural history in Virginia. It is eligible under criterion B because of its association with prominent national figures, including U.S. Presidents Thomas Jefferson, James Madison, and James Monroe, as well as individuals significant in local and state history including W. D. Meriwether, Thomas Walker, and Thomas Mann Randolph. The district qualifies under criterion C as a rural historic district with a collection of antebellum, late nineteenth- and early twentieth-century residential, farm, commercial, and institutional buildings, and historic landscape features with associated outbuildings and agricultural complexes that exhibit by their style, type, and craftsmanship, the distinctive regional characteristics of the Piedmont region of Virginia. The Southwest Mountains Rural Historic District is eligible under criterion D because it is likely to yield important information on the lives of occupants of both African and European descent, and provide information on the social, cultural, and domestic traditions of these people.

HISTORICAL BACKGROUND

AGRICULTURE

The Southwest Mountains lie in the northeastern portion of Albemarle County; this name possibly suggests the direction in which they point and has been used to describe this rural district of farmland, forests, and small rural settlements that are concentrated in the area where Albemarle County's earliest settlers first established their homes.

The Southwest Mountains area is known not only for its pastoral beauty, but for its rich agricultural lands. More than half of the historic farms in the area are located within approximately one-quarter mile of some prime soils.¹ Those properties possessing architectural significance are likely to be located on prime soils, demonstrating that early growth patterns for

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 3

the Southwest Mountains region were influenced directly by agricultural suitability and productivity. Consequently, the predominant historical theme in the Southwest Mountains region is agriculture, with its development affecting all other facets of rural life, including architecture, industry, transportation, and commerce.²

Settlers first used the land's resources for a variety of purposes. Residents of Tidewater Virginia came to the Southwest Mountains region in the 1720s and 1730s to take advantage of land patents that required the establishment of farms on properties.³ Since these pioneers used the most available and convenient materials to build their homes, wood was the obvious choice. Indigenous timber was also used to construct outbuildings and fences, as well as for firewood, charcoal production and tanning purposes. Deforestation continued with the clearing of land for agricultural purposes.⁴ The unbroken, virgin forest quickly developed into a patchwork of open fields.⁵

Tobacco immediately became the primary crop of the Southwest Mountains area. Large tobacco plantations arose, distinguishing the area's layout from the smaller, more diversified farm structure of western Albemarle County.⁶ Production increased rapidly during the early eighteenth century, mainly because tobacco provided farmers with a successful cash crop. Yet tobacco had its disadvantages. Its labor-intensive nature required a large number of people, mostly slaves, to harvest the crop. Also, tobacco quickly exhausted the rich land's nutrients, requiring plantation owners to acquire new areas for production.⁷ Still, tobacco retained its position as the Southwest Mountain's major crop for decades.

While farmers used money raised from the sale of tobacco to purchase goods that they could not produce themselves, the healthy soil and seemingly endless timbers of the Southwest Mountains allowed virtual self-sufficiency for many plantations. Most goods were made directly on the plantations where individuals, mostly slaves, practiced weaving, carpentry, blacksmithing, and other trades. While tobacco remained the major crop for some time, wheat, corn, barley, and oats also were grown, and cows, pigs, sheep, and chicken raised for family use.⁸ Major Thomas Anbury, a British prisoner held in the Southwest Mountains during the Revolution, noted that "each plantation has the appearance of a small village."⁹

By the time of the American Revolution, tobacco no longer dominated the agricultural scene in the Southwest Mountains area. Its quick expenditure of the soil's nutrients combined with an increased demand for wheat and corn encouraged early planter families to cultivate other crops. Additionally, the loss of British markets made growing tobacco less attractive and contributed to the change in emphasis of agricultural production in the area.¹⁰ Tobacco cultivation continued but production never again reached early levels.¹¹

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 4

Several farming innovations, however, originated in the area. The Albemarle Agricultural Society, founded in 1817, was a nationally influential organization formed by many prominent Virginians, including James Madison and W.D. Meriwether, to promote improvements in agriculture. Madison's participation underscores the historical and agricultural linkages between the Southwest Mountains Rural Historic District and the adjacent Madison-Barbour Rural Historic District. Thomas Mann Randolph, of Edgehill, the society's first vice-president and Thomas Jefferson's son-in-law, invented a hillside plow designed to control erosion. Another of the society's members, Peter Minor of Ridgeway, worked with Cyrus McCormick on an improved moldboard plow. The society also was involved in sponsoring Albemarle's first county fair, an important commercial and social event which acted as a forum for the exchange of ideas on farming and new technologies.¹²

The society's leadership on the national level took place in the form of The American Farmer, an agricultural journal which began publication in December 1819 and which was the first of its kind in the United States. The journal's articles covered a variety of agricultural concerns and inventions. Thomas Mann Randolph wrote numerous articles on agricultural pests such as the botfly of horses, the hessionfly, and other species. His son Thomas Jefferson Randolph published a work on fallows and manures. Others wrote on topics ranging from uses of the rutabaga and mangel wurtzel, to the effect of plaster of paris on the development of oats.¹³

Conservation also played a role in the region's formation with Jefferson and Madison as the most illustrious proponents. In the late eighteenth and early nineteenth centuries, Jefferson and several other Albemarle planters attempted to initiate agricultural reforms on lands depleted by years of tobacco production, poor farming methods, and erosion. Reform efforts included rotating crops, planting grains, and applying animal and vegetable manures.¹⁴ Abuse of the seemingly endless supply of timber in the Southwest Mountains led Madison to speak against "the injudicious and excessive destruction of timber and firewood."¹⁵

Still, an increasing population coupled with rapid technological advancement led to greater deforestation in the period from 1830 to 1860. While fewer tobacco fields were planted, corn and wheat became the region's staple crops. Also introduced in this period were beef cattle which required further clearing of lands for pastures. With the Albemarle Agricultural Society's encouragement, Piedmont Virginia became a forerunner in the movement for improved livestock.¹⁶

While the Civil War period brought little physical destruction of buildings and structures in the Southwest Mountains vicinity, both Confederate and Federal armies pillaged the area's livestock and agricultural supplies. Also, the absence of military-age men from area plantations

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 5

undoubtedly affected the operations of many plantations. Yet most important to the region was the war's dissolution of Virginia's plantation economy based on slave labor. A new economic and social order was to result.

The post-war era brought depression to the Southwest Mountain region. Between 1860 and 1870 the number of farms in the region declined from 935 to 824 and the production of all crops, including corn, wheat, and tobacco, decreased. Land previously cleared for plowing and pasture was abandoned and eventually reverted to its original forested state. Large plantations were divided and smaller parcels sold, increasing the number of plantations to 2,000 by 1880.¹⁷ The postbellum era also hastened the decline of an agriculture based on tobacco and grains to one based on a mixture of viniculture, orchards, sheep, beef cattle, and dairying. This diversified economy gave birth to a new landscape in the Southwest Mountains.¹⁸

Recovery from the Civil War was slow, but by the late nineteenth century, some residents were building larger and more extravagant residences than had been previously found in the Southwest Mountains area. Much of the money for this development came not from the Southwest Mountains agricultural economy but from individuals who acquired their fortunes elsewhere. Yet the region gained much from this influx of wealthy residents. Newcomers from other areas, primarily the northeastern United States, injected dollars into the local economy, allowing farmers to benefit from increased agricultural technology, purchase thoroughbred horses for breeding purposes, and develop one of the first Hereford cattle operations in the United States.¹⁹

Around this time, the breeding and raising of fine horses became one of the region's prime industries, and remains so today. The Keswick Hunt Club came into existence in 1876 when seven area residents pooled their hounds to form the organization, and the first Keswick horse show was held in 1904. The club has remained an active social center for the region. The importance of the hunt to the social and recreational life of the region undoubtedly has promoted the preservation of rural land and open space. Keeping ample rural land accessible for hunting and other equestrian activities has resulted in the preservation of open fields, forested areas, and natural features.

The number of farms in Albemarle County continued to grow throughout the early twentieth century, peaking in 1924 at 3,379. While numbers predictably dropped during the Great Depression, the post-World War II boom brought a resurgence to the area, especially in beef cattle production. The horse industry also increased in importance at this time, and local horse trainers achieved national prominence with several breeds. Some training operations founded at this time currently compete on the national level.²⁰

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 6

In contrast to agriculture in early Albemarle County, today's agriculture is largely forage-based, with ninety-six percent of lands devoted to growing hay and pasture, a not unsurprising figure for an area with active horse farms.²¹ The transformation of a crop-oriented agriculture to livestock breeding agriculture is reflected in the area's twentieth-century architecture, which includes a number of horse and cattle barns.²² Many older plantations have become "agricultural showplaces," consisting of large country estates with various outbuildings to house horses, cattle, and other livestock.²³ Although its focus has changed, agriculture remains the Southwest Mountains' most significant and prosperous economic pursuit.

TRANSPORTATION

The region's initial success as an agricultural area depended heavily on the establishment of a sophisticated network of roads early in its development. No efficient waterways linked the Southwest Mountains with the important Tidewater towns and cities; the Rivanna River's fall line fell below the mountain region and large vessels could not travel further than Richmond. Therefore, early in the area's development, residents constructed a network of roads, which often ran along ridges to take advantage of natural grades and good drainage.²⁴ Many of these roads are still in use today.

By 1748, foundation for the area's present-day road system was in place.²⁵ Two "Mountain Roads" ran toward the Blue Ridge: the Old Mountain Road from Hanover County known today as Route 22, and the road from lower Goochland County, known as the Three Notched Road and presently part of U.S. Route 250. The Fredericksburg Road, today's Route 231, ran north from its intersection with the Three Notched Road at Shadwell into Orange County, eventually leading to Fredericksburg. The Fredericksburg Road and the nearby Coursey Road (Route 20), which ran along the western ridge of the Southwest Mountains, paralleled one another and presented the shortest routes to major markets for the area's inhabitants. As a result, settlers began establishing their farms and residences along these two roads.²⁶ Evidence of this pattern remains today, with many of the surviving plantations retaining their grand tree-lined entrance lanes off Route 20 and Route 231. About 1745 the Fredericksburg and Coursey roads were connected by several roads crossing through gaps in the mountain range, including the Turkey Sag Road (Route 640) and Hammock's Gap Road (Route 612), the latter of which survives only on the western side of the ridge.

Wherever two of these roads intersected, small settlements developed. Shadwell, for example, evolved where Old Mountain Road and Three Notched Road met. Many towns developed along the Fredericksburg Road including Cismont, which was formed at its intersection with Old Mountain Road, and Cash Corner further to the north where Turkey Sag Road came in from the

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 7

west. Turkey Sag Road continued east from Cash Corner to intersect with Old Mountain Road at Cobham. These roads represented much more than the area's ability to connect with trade centers. As the population increased and roads improved, taverns, stores, mills, and small commercial ventures developed along them.²⁷ The Walker's Mill on Route 231 and Merrie Mill along Route 22, both built by members of the Walker family, are sited at the intersection of their respective roads with the creeks used in association with the mill operations. Residents built their residences within easy access of these routes and the region's social structure took root. Churches and governmental centers grew, stabilizing both the region's social and economic systems. Still the primary use of roads remained that of transporting agricultural products to other parts of the state.

The opening of the Rivanna River just south of Shadwell to navigation in 1789 greatly aided in the transport of agricultural products to markets in Richmond and the Tidewater region. Milton, situated at the head of navigation on the river, accessed the Southwest Mountains by the Three Notched, Fredericksburg, and Hammocks Gap roads. Milton quickly became an important port town and the Rivanna a significant mode of transportation for the Southwest Mountain residents. Shadwell especially benefitted from the river's opening as it lay on the road between Milton and the Southwest Mountains. While roads remained the most important form of travel, the Rivanna's opening increased trade and therefore prosperity throughout the region.²⁸ Thomas Jefferson had a mill, canal, and dam built just above Milton to take advantage of the Rivanna's power. The mill ruins and traces of the wooden locks remain today.

This strong river trade lasted only about half a century. By the time railroads came to the Southwest Mountain region in the mid-nineteenth century, the canals built to facilitate travel through the Rivanna had experienced damaging siltation. The Rivanna could not compete with the Louisa Railroad (today the Chesapeake and Ohio), which came to the area in 1840, and eventually the river fell into complete disuse for commerce and transportation.

The introduction of rail transportation to Albemarle County during the antebellum period provided further commercial opportunities for residents of the area surrounding the Southwest Mountains. In 1840 the Louisa Railroad reached Gordonsville, making it the westernmost railhead in central Virginia.²⁹ The new railroad at Gordonsville allowed residents to travel and trade with Fredericksburg and Orange County in a more efficient manner. Like earlier roads, the railroad continued the economic orientation of many inhabitants towards the Gordonsville and Orange County regions; this trend continued until the railroad was expanded to Charlottesville in 1848.³⁰

Local planters, such as Peter Meriwether, found that the railroads were a fast and inexpensive

United States Department of the Interior
National Park ServiceNational Register of Historic Places
Continuation SheetSection number 8 Page 8

means of transporting agricultural products. Together with the already existing road network, the railroads became vital transportation links.³¹ The railroads also precipitated the development of small communities such as Keswick, Lindsay, and Cobham in the vicinities of depots. Small commercial operations tied to agriculture and the railroad developed during the antebellum period, including a sawmill at Campbells, quarries at Rougemont (Peachyforum), and a distillery near Cismont.³²

Railroads also promoted cultural diversity in the Southwest Mountains by facilitating the region's ability to import goods from afar. The prosperity brought from increased trade encouraged residents to demolish old structures and build new ones using materials such as marble and nonindigenous woods previously unavailable in the area.³³ The railroad's significance as transportation and communication links resulted in the destruction of Keswick's depot and railroad during the Civil War.³⁴

The railways begun in the nineteenth century remain in use today, but their role lacks the prominence of previous eras. Automotive travel has replaced the rails as the most convenient and cheapest method of transport. The district's roads first built during the frontier period remain the area's most efficient form of transportation for both private travelers and commercial truckers.

SOCIAL/CULTURAL

Many prominent local, state, and national figures contributed to the development of the Southwest Mountains area.³⁵ Most notable were Thomas Jefferson, who was born and spent part of his childhood on the Shadwell Plantation, and James Madison, whose residence lay outside the region's northern boundary. Both were educated in the district at Maury's school; had social, intellectual, and political ties with many families; and traveled throughout the district in the course of their daily affairs. These two men also brought numerous innovations and incalculable influence to the area. As members of the Albemarle Agricultural Society they played a large role in the development of the region's farming community. Jefferson also assisted in the improvement of the Rivanna River for navigation.

Jefferson's family contributed to the social and cultural development of the area. Martha Jefferson and her husband Thomas Mann Randolph were the first residents of the famous Edgehill plantation. There, in 1829, after their departure from Monticello where they had been part of Jefferson's household, they founded a School for Young Ladies, which they opened to pay the debts of Randolph and his deceased father-in-law, Thomas Jefferson. The Edgehill School was one of the first boarding schools for girls in Virginia. The venture proved

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 9

successful, and twenty years after the school's founding, the Randolphs were free from debt.³⁶ During the antebellum period several private schools were founded, such as Dr. Mann Page's Keswick, which attracted students from all areas of the Piedmont region. Years earlier the Reverend James Maury had taught Thomas Jefferson, James Madison, and James Monroe at his aforementioned private classical school in the Fredericksville Parish of the Southwest Mountains region. These individuals and their families helped distinguish the region from other rural areas of Virginia.

Many residents of the Southwest Mountains today are direct descendants of the region's first families. Castle Hill, originally part of the Nicholas Meriwether estate, came into the hands of Dr. Thomas Walker in 1741. Judith Page Walker, Dr. Walker's granddaughter, married William Cabel Rives, a prominent citizen who served twice as minister to France and in both the United States Senate and Confederate Congress. Today the Rives family remains active in the cultural and social life of the community. Through marriage, social interactions, political and business connections, the prominent early families of Virginia united in the Southwest Mountains to create a lively and stimulating, yet rural, environment with considerable influence locally, in the state, and nationally.

The Grace Church of the Fredericksville Parish, built in 1855, continues to be a strong presence in the Southwest Mountains. Jefferson, a member of the Episcopal Church, belonged to the Fredericksville Parish. The first church on the existing parish site was Mountain Chapel, erected in 1724. After its destruction a series of buildings replaced it until finally the Grace Church was erected. As now, churches of the time fulfilled both an important spiritual and cultural function. Under the influence of John Stewart, master of the Keswick Hunt Club, Grace Church began in 1928 to hold their annual Blessing of the Hounds service, originally an old English tradition. This ceremony, rarely seen in the United States, remains a popular Thanksgiving rite at Grace Church.³⁷

Aside from introducing the Blessing of the Hounds to Albemarle County, the Keswick Hunt Club stands as a monument to the Southwest Mountain area's cultural development. Its founding represented a complete transfer from an agriculture based on crops such as tobacco and wheat to one based on cattle and horse breeding. In 1904, the Keswick Hunt Club held its first annual horse show at which individuals could display their stock according to classes that included hunters, jumpers, roadsters, and harness horses. What was then a one-day event now lasts several days and includes some of this nation's finest horses.³⁸

In addition to restructuring the region's economy, the postbellum era also marked social changes including the formation of African-American communities. With agriculture as the area's

United States Department of the Interior
National Park Service

National Register of Historic Places Continuation Sheet

Section number 8 Page 10

economic basis, slavery, while not as widespread in the Southwest Mountains as in other parts of Virginia, had existed since the community's founding and became a necessity for economic growth after 1760.³⁹ Society expected gentlemen to own slaves, and ownership was one symbol of social status.

With slavery abolished, many landowners in the antebellum era allowed their former slaves to keep working the land as paid tenants who also were supplied with housing and other basic needs. In time, a large number of African-Americans were able to purchase small parcels where they established small trade shops using skills learned on the plantation, such as shoemaking, carpentry, plastering, and blacksmithing. Yet often these skilled individuals moved to cities, leaving the countryside to those who worked the land. With much smaller parcels than their white counterparts, African-Americans generally cultivated vegetables and other food staples for subsistence, leaving dairy and horse farming to more affluent whites.⁴⁰

With an independent African-American population, schools, churches, and other institutions developed to fulfill their needs. As in the white community, churches, primarily Baptist, played a large role in the daily lives of African-Americans. Preachers acted as community leaders; meetings held on church grounds allowed individuals to exchange important information; and social events took place on these communal grounds. Other organizations formed to fill a variety of needs. For example, the Odd Fellows, a lodge organization derived from the Masons, provided insurance for widows and orphans as part of membership. Schools played a less significant role in the community's development. While considered important, children often could not attend classes because they needed to work or simply could not trek the distance in bad weather.⁴¹ In the Southwest Mountains region miniature "downtowns" developed within African-American communities, with the church, school, and Odd Fellows hall adjacent to one another. Predominantly African-American communities still exist in the Southwest Mountain area today, although their size and numbers are steadily declining. The trend begun after the Civil War of African-American migration from rural areas to more urban areas where work was more plentiful continues today in the district as in other parts of Virginia.

Although exurban development has occurred with the subdivision of a few large parcels, the history of the Southwest Mountains Rural Historic District is still evident both in its historic properties and the agrarian way of life that characterizes the district. Agriculture and forestry remain as major land uses, and area residents continue many of the social and cultural traditions established by the area's first settlers. Continuity of social and cultural life is a major character-defining aspect of the district since the district's historic properties provide an appropriate environment for domestic life, farming, worship, and recreation. The environment is well-suited to the traditional activities of horsebreeding, fox hunting, and riding that are closely associated

United States Department of the Interior
National Park ServiceNational Register of Historic Places
Continuation SheetSection number 8 Page 11

with the district. Since many transportation routes have not been straightened or widened for decades and few new roads have been introduced, historic properties retain the significant linkages that encourage a close-knit rural community. The continued use of institutions such as Grace Episcopal Church, Saint John's Baptist Church, the Odd Fellow's Hall, the Keswick Hunt Club, and the country stores at Cobham and Cash's Corner, located off or near these roads, also contributes to the historic associations and feeling of the district. The district represents the evolution of the region from the eighteenth century through the early twentieth century and still bears strong resemblance to the Southwest Mountains of Jefferson and Madison's day in terms of land use, ownership patterns, and agrarian and rural ways of life.

17/726920/4212860, then proceed northeast approximately 1 mile 670' to a point delineated by UTM reference S 17/728900/4214000, then proceed northwest to a point delineated by UTM reference T 17/726490/4214700, then proceed west approximately 1,700' to a point delineated by UTM reference U 17/727970/4214750, then proceed northwest approximately 5,100' to a point delineated by UTM reference V 17/730450/4217080, then proceed northwest approximately 1 mile 1,370' to a point delineated by UTM reference W 17/726230/4217850, then proceed northeast approximately 1 mile 1,220' to a point delineated by UTM reference X 17/730510/4217610, then proceed southeast approximately 4,100' to a point delineated by UTM reference Y 17/728780/4219140, then proceed northeast approximately 1 mile 1,520' along the southern right-of-way of route 20 to a point delineated by UTM reference Z 17/729960/4220800, then proceed north approximately 1,300' to a point delineated by UTM reference AA 17/729940/4221200, then proceed north approximately 1,000' to a point delineated by UTM reference BB 17/729950/4221200, then proceed northeast approximately 1 mile 510' to a point delineated by UTM reference CC 17/731070/4222690, then proceed northeast approximately 700' to a point delineated by UTM reference DD 17/731240/4222770, then proceed north approximately 1 mile 1,920' to a point delineated by UTM reference EE 17/733350/4223040, then proceed north approximately 1 mile 2,220' to a point delineated by UTM reference FF 17/733400/4225380, then proceed northeast approximately 900' to a point delineated by UTM reference GG 17/733500/4225640, then proceed northeast approximately 3,350' to a point delineated by UTM reference HH 17/734400/4226190, then proceed northeast approximately 3,500' to a point delineated by UTM reference II 17/735380/4226640, then proceed northeast approximately 4,100' to the point of the beginning.

BOUNDARY JUSTIFICATION

The boundaries of the Southwest Mountains Rural Historic District have been drawn to include Routes 20, and 22/231, the two historic roads which run parallel on each side of the Southwest Mountains, and the properties along these routes which contribute to the region's agricultural character. The district has also been designed to abut the southern border of the Madison-Barbour Rural Historic District. When roads or political boundaries are not used, property lines are employed wherever possible to create historic district boundaries.

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 10 Page 4

The boundary line frequently zig-zags to accommodate varying sizes of properties. The boundaries have been drawn to include the communities of Lindsay, Cobham, and Keswick, traditional commercial centers of the district and Route 647, a primarily early twentieth century African-American settlement. Areas with large concentrations of noncontributing properties have been excluded wherever possible; this exclusion specifically includes the segment of Route 22 between Route 740 and Cobham and the northern right-of-way of Route 640 where there has been considerable subdivision.

At one point on the southern end of the district, the boundary takes a large southeastern jog away from Route 231. This occurs because properties along this portion of the road are unusually deep; consequently, the line extends to the CSX Transportation Railway, runs briefly along the track and heads northwest, back to Route 231.

The line's easternmost route follows property lines along the eastern boundary of Route 231, at times departing from its original course to include small towns and communities of historical significance. Rare deviations from this pattern occur. Occasionally the line extends two properties deep along Route 231 to include properties with architecturally significant buildings; this configuration allows inclusion of such important properties as Findowrie and Little Virginia.

Route 20 serves as the principal transportation route on the west side of the mountains. Wherever possible, boundaries were set to include the visual corridor established by this route. At several points, the boundaries on the west side may appear to be somewhat jagged. This can be attributed to the irregular configuration of property lines along the west side of Route 20.

At two points, however, the boundary departs from this course and simply follows the Rt. 20 right-of-way. The first exception occurs along Route 20 where Albemarle County tax parcels 34-70 through 34-70B have been excluded from the district due to a concentration of noncontributing properties. The same is true for a line of parcels (47-72 through 47-22) further south on Route 20.

The second departure from this rule is evident in the southern part of the district where numerous parcels were excluded due to concentrated subdivision and development. It is

**United States Department of the Interior
National Park Service**

National Register of Historic Places Continuation Sheet

Section number 10 Page 5

important to note that while such intensive subdivision has already taken place, the surrounding properties within the district tend to be large parcels, some set within established agricultural and forestal districts; other properties in this part of the district, such as Valmontis and Barrsden, contain early important farm buildings.

The southwestern boundary brushes the northern boundaries of concentrated modern residential development near Eastham; crosses Route 20, and continues along lines established by the existing agricultural and forestal districts. Upon reaching the ridge of the Southwest Mountains, the boundary drops southward to the Interstate 64 right-of-way.

The preparation of this nomination report was a joint effort of Land and Community Associates and the Virginia Department of Historic Resources. Persons involved include:

Land and Community Associates

Genevieve P. Keller, architectural historian and LCA project coordinator

Julie Gronlund, historian

Heather Maginniss, historian

Margarita Wuellner, architectural historian

Department of Historic Resources

Julie L. Vosmik, project coordinator

Jeff M. O'Dell, architectural historian

Richard L. Silverman, DHR summer intern

Description of the project

In March 1991 the Department of Historic Resources contracted with Land and Community Associates of Charlottesville to prepare a National Register nomination for a potential rural historic district tentatively called the Southwest Mountains Rural Historic District. LCA staff researched available material in the DHR archives and other sources and conducted fieldwork in the eastern segment of the district (east of the ridgeline of the Southwest Mountains). Building on an intensive survey of key properties in the area undertaken by DHR architectural historian Jeff O'Dell in the mid 1980s, the LCA survey team visited all properties, recording any that were not surveyed in the earlier DHR survey, and noting any changes to those that had been surveyed earlier.

By May 1991, expanded district boundaries and the large scale of the project demanded that the DHR take a more active roll in the project. Working with Jeff O'Dell, summer intern Richard Silverman, a second-year student in the Masters of Architectural History program at the University of Virginia, undertook the necessary fieldwork in the western segment of the district.

LCA staff prepared a draft of the nomination form, as well as text for Sections 7 and 8, including a complete inventory for the eastern sector. Richard Silverman prepared a complete

**United States Department of the Interior
National Park Service**

National Register of Historic Places Continuation Sheet

Section number 11 Page 2

inventory for the western sector, and Jeff O'Dell revised and expanded the text of Section 7. DHR Survey and Register Section staff were involved in the preparation of the final report.

Many photos used in the Photographic Documentation section were taken during the DHR's mid-1980s intensive survey of northwestern Albemarle County. Newer photos were used whenever possible, but when better photos existed for resources that had not changed, those were used.

DHR and LCA staff would like to acknowledge the assistance of the Albemarle County Planning staff (especially Mary Joy Scala) and Piedmont Environmental Council's Charlottesville office (especially Sherry Buttrick and Tim Lindstrom) for providing technical information and for helping to formulate historic-district boundaries. The project is also indebted to the work of Katherine Imhoff and other members of the PEC staff who undertook a DHR-sponsored study of the Southwest Mountains area in 1986-87.
