Describe present and historic physical appearance.

The Thomas-Conner House is located on a large lot on a low hill to the west of Draper Road, formerly known as Water Street, beyond the southwestern edge of the platted sixteen squares of the town of Blacksburg. It was originally flanked by the 1840s female academy (demolished) and the Phillips-Ronald House (150-15, also being nominated), both of which were large buildings also located on sizable tracts. The properties were separated from the town lots by Stroubles Creek, which now flows under Draper Road. The house is a stylish version of the traditional regional double-pile, center-passage house. It features a shallow, flat-topped, hipped roof and central gables on each of the front and side walls. Both the northwest side and northeast front facade are nearly identical, with a three-bay front featuring a central arched door on each floor flanked by arch-headed, two-over-two double-hung sash windows. The openings are capped by brick, arched label molds and feature original louvered blinds. The stretcher-bond brick walls are headed by a deep cornice, supported by paired Italianate brackets, which contains a built-in gutter. Each of the entry doors on the two principal facades is sheltered by a three-bay, one-story porch with arched openings supported by square columns and surmounted by flat roofs with balustrades.

The chimneys are placed in the Georgian plan position, with mantels placed back to back between the two rooms on either side of the central passage. Mantels have plain Greek Revival pilastered forms. The rear wall of the passage is curved to accept the open-stringer stair that rises at the end of the passage. Interior doorways feature pilasters supporting a molded cornice, while door and window jambs are paneled and the architrave trim is a flat, angled, Greek Revival ovolo. The present owners have added closets in corners of the passage, paneled wainscot, and crown molding, but have not irreversibly altered the interior and most features remain. A one-story ell of stretcher-bond brick is connected to the main house by a frame vestibule and has an enclosed porch along the southeast side.
