The Martinsville Fish Dam is one of the few aboriginal fish-trap of this type discovered in Piedmont Virginia. The dam is probably associa with a prehistoric Indian village located about 1,000 feet to the northwes on the River which was excavated in 1963 by members of the Patrick Henry Chapter of the Archeological Society of Virginad which by internal evidence dates to the latter part of the late Woodla period or the early part of the Mississippi period in the East (roughly covering the period 1200 A.D. to 1400 A.D.).  The dam, in excellent state of preservation, is easily accessito the public by automobile on both sides of River. Recently donate its owners to the Archeological Society of Virginia, it is to be preserved within a small park for the education and enjoyment of the public. Commer interests located nearby have agreed to provide funds to prepare the site, to build an adequate over-look on the Easture, and to provide maintenance	The Martinsville Fish Dam is one of the few aboriginal fish-trap of this type discovered in Piedmont Virginia.
