**National Register of Historic Places
Registration Form**

LISTED ON:

VLR 12/18/2008
NRHP 7/28/2011

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Marion Historic District Boundary Increase

other names/site number DHR # 119-0012

2. Location

street & number Areas of: West Cherry Street; East Main Street; North Main Street; NA not for publication
and Maple, North Chestnut, Broad, and North Commerce Streets

city or town Marion vicinity NA

state Virginia code VA county Smyth code 173 zip code 24354

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set for in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

Narrative Description

(Describe the historic and current condition of the property on one or more continuation sheets.)

8. Statement of Significance**Applicable National Register Criteria**

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B** Property is associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity who's components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations N/A

(Mark "x" in all boxes that apply.)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** moved from its original location.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property
- G** less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance

Marion Historic District Boundary Increase
Marion, Smyth County, Virginia

Section number 7 Page 1

SUMMARY DESCRIPTION

The Marion Historic District is located in the town of Marion, Smyth County, Virginia. Marion is located approximately 45 miles northeast of Bristol at the Tennessee/Virginia border, and approximately 275 miles southwest of the capitol of Richmond, Virginia. Marion is located on Highway 11, a significant feature in the town's history. In 1995-1996, a limited reconnaissance survey of Smyth County's historic architectural properties partially inventoried the town of Marion. This survey documented 151 properties as eligible for listing in the National Register of Historic Places. In 1998-1999, the remaining properties within the proposed historic district were inventoried. In 2000, the Marion Historic District was listed in the National Register of Historic Places. The existing district comprises a significant portion of Marion's commercial and residential center. It includes an intact, contiguous area containing commercial and institutional properties lining the principal blocks of Main Street and domestic structures in neighborhoods to the north and south.

In 2007-2008, a subsequent reconnaissance survey identified additional properties on streets adjacent to the existing district boundaries. Following the same pattern of residential development, these properties meet the criteria of resources within the existing district. Established in 1832, the town of Marion was defined by its relationship to the main road (US Highway 11, today), a major thoroughfare and route of commerce from eastern points. As the town's commerce developed, businesses and the earliest dwellings were located along Main Street. Later residential neighborhoods expanded to the streets north and south of the commercial area. The 2007-2008 survey continues the identification of Marion's historic residential neighborhoods, as well as commercial areas.

The boundaries of the existing district, as well as those of the proposed increase, represent the significance of Marion's history as an important center of commerce/trade and education. This history reflects broad patterns of development of the county seat of Smyth County along an important trade route, including rapid industrial and commercial growth during the late nineteenth through early twentieth centuries. Marion's central location in the county, as well as rail and water transportation routes and rich mineral and lumber resources, facilitated its growth. The town's prosperity is reflected in the quality of its architectural character. Dating from around 1855, extant commercial and residential buildings compactly arranged on a street grid create a highly intact district. In the existing district, of the 205 buildings, sites, structures, and objects inventoried, 155 or seventy-six percent, are contributing. Contributing resources are at least fifty years old and possess sufficient architectural character and/or historical significance to meet National Register criteria. Non-contributing resources in the existing district number fifty (50), or twenty-four percent, and are less than fifty years old, or have been altered. The boundary increase adds 205 contributing buildings/sites and 69 non-contributing buildings/sites, with a contributing percentage of approximately 67%.

INVENTORY:

NEWLY SURVEYED RESOURCES:

- 1.) 311 Bluff Street 119-0012-0206 Contributing
One-and-a-half-story, gable-front-and-wing Colonial Revival house built in 1938 has a gable roof with asphalt shingles, interior and exterior end chimneys, stretcher-bond brick exterior, concrete foundation, front patio, original six-panel door, four-light transom, bay window with a central six-over-nine sash window flanked by a four-over-six sash windows. Other windows are original six-over-six sash. Gable dormers with six-over-six wood sash windows; attached, single-bay garage with original paneled-wood, integral porch with original wood posts and original nine-light-and-two-panel door.
- 2.) 111 – 113 Broad Street 119-0012-0224 Contributing
Two-story, ca. 1950, commercial building with flat roof, brick exterior, and two storefronts with original single-light glass-and-wood door, transoms (one fitted with an air conditioning unit); currently occupied by Rosewood Florist and Headliners. The upper front has two bays, each with three two-over-four-over-two metal windows. The outer portions each have three canted wooden windows. Art Moderne aluminum cornice above storefronts; gravel driveway.
- 3.) 116 Broad Street 119-0012-0225 Contributing
Two-story, brick commercial building built ca. 1945 with poured-concrete foundation, flat asphalt roof, and exterior of five-course common-bond brick; original storefront with aluminum-and-glass display windows, original blue Carrera glass panels, and an aluminum-and-glass door. The central bay has an original garage entrance with a glass-and-aluminum overhead track door. Windows on the second floor are original paired seven-light steel awning design with concrete sills. Ca. 1950, one-story brick wing with an enclosed garage bay and original display windows with brick bulkheads. Original, multiple-light steel awning windows on the first and second floor; the latter have concrete sills. Entrance with three-panel wooden door; garage bay with ca. 1970 metal garage; ca. 1970 door and windows.
- 4.) 121 Broad Street 119-0012-0226 Contributing
One-story brick commercial building built ca. 1955 has a concrete foundation, flat asphalt roof, and exterior of six-course common-bond bricks, original slanted inset storefront with aluminum-and-glass display windows and concrete bulkheads, surround with concrete panels; main entrance has a ca. 1990 single-light anodized-aluminum glass-and-wood door; original three-light fixed aluminum window with a concrete surround.
- Ca. 1980 steel open vehicle storage building. Non-Contributing
- 5.) 200 Broad Street 119-0012-0227 Non-Contributing
One-story, ca. 1965, Colonial Revival commercial building with an asphalt-shingled hipped roof and a brick exterior; the foundation is not visible. Façade has slightly extending side walls and three bays, central bay with a pair of aluminum single-light doors with sidelights, outer bays with a pair of single-light aluminum windows; asphalt driveway, concrete sidewalk in front of the building.
- 6.) 207 Broad Street 119-0012-0228 Non-Contributing
One-story concrete-block building built ca. 1940 has a flat asphalt roof, interior wall brick chimney, and poured-concrete foundation; front altered ca. 1970 with a brick skirt wall, vertical-board panels, and entrances with glass-and-wood doors. Above the storefront is a wood-shingled shed-roofed canopy. Windows are original paired three-light steel casement design with a two-light transom and concrete sills.
- 7.) 210 Broad Street 119-0012-0223 Non-Contributing

National Park Service**National Register of Historic Places**
Continuation SheetMarion Historic District Boundary Increase
Marion, Smyth County, VirginiaSection number 7 Page 3

Two-story, ca. 1970 commercial building has a flat roof and a brick exterior; its foundation is not visible. The upper front has a central ca. 1970 interior-lit sign advertising Heilig Meyers and outer simulated window groupings with shutters, pediments, and columns. The lower front is slightly recessed and has ten large mirrored-glass panes; on one side is a pair of aluminum-and-mirrored-glass doors with a transom; full-width concrete patio with simple wooden posts; paved parking lot, gravel drive, sidewalk in front of the building.

8.) 211 Broad Street 119-0012-0229 Contributing
One-and-a-half-story, ca. 1935 Tudor Revival house with a side-gabled asphalt-shingled roof, one brick exterior end chimney, large shed dormer, brick exterior and foundation, three one-over-one wooden windows; projecting gabled bay with a small inner diamond-shaped-pane window and an outer paneled door with a storm door accessed via a concrete patio. Attached metal carport with a flat roof, asphalt driveway.

Ca. 1935 two-story three-car garage with a side-gabled, asphalt-shingled roof, brick exterior, original vertical-wooden-board doors, and upper living space accessed via a ca. 1990 wooden staircase. Contributing

9.) 215 Broad Street 119-0012-0230 Contributing
One-and-a-half-story, ca. 1930, Tudor Revival house with side-gabled roof covered ca. 1990 with crimped metal, stucco-and-half-timbering and brick on the exterior, brick foundation, one-story rear wing with a separate apartment. Three-bay façade: upper gable with a small window, an outer lower six-light metal window, and an inner lower single-light glass-and-wood door; center bay has two lower six-light windows and an upper pair of multiple-light metal casement windows; flat-roofed carport with wooden posts. Walkway leads to rear asphalt parking area.

10.) 219 Broad Street 119-0012-0231 Contributing
One-and-a-half-story, gable-front Bungalow built ca. 1925 has gable roof of asphalt shingles, interior and exterior wall brick chimneys, exterior of stretcher-bond brick, foundation of rock-faced concrete blocks, hipped roof porch with an original brick railing enclosed ca. 1980 with wood and masonite panels and a wooden door. The main entrance is not visible. Windows are original six-over-one wood sash with brick sills, exposed rafter tails, knee-brace brackets; asphalt parking lot, chain link fence, concrete entrance walkway.

11.) 230 Broad Street 119-0012-0232 Contributing
One-story frame house built ca. 1915 has a gable roof of crimped metal, exterior of asbestos shingles, concrete foundation, and central brick chimney; full-width shed-roofed porch with ca. 1990 wooden posts and a wood lattice railing, a ca. 1990 glass-and-wood door, ca. 1990 one-over-two vinyl sash windows.

Original frame storage shed with vertical-board siding, a gable roof of crimped metal, and a hinged wooden door. Contributing

12.) 236 Broad Street 119-0012-0233 Non-contributing
One-story, steel, commercial building occupied by Signs 'N Such building, built ca. 1970. The southern wall is of concrete blocks, while the rest is of steel construction. The building has a gable roof, an exterior of vertical steel panels, and a concrete foundation. It also has aluminum-and-glass doors and single-light windows.

13.) 305 Broad Street 119-0012-0234 Contributing
Two-story, ca. 1890, central-passage house shares a lot with the building at 244 Franklin and has a side-gabled crimped-metal-covered roof, one exterior and one interior brick chimney, weatherboard siding, stone foundation, symmetrical, three-bay façade, three-over-one wooden windows, six-light wood-paneled door and a storm door with a two-light transom and four-light sidelights, full-width, one-story porch with a hipped roof frame without a cover, a wooden floor, brick piers, and tapered wooden posts; rear wing, likely dating from ca. 1920, has a gabled metal-covered roof, weatherboard siding, and a ca. 1970 opening; gravel driveway.

14.) 312 Broad Street 119-0012-0235 Contributing

United States Department of the Interior

One-and-a-half-story Bungalow built ca. 1920 has a gable roof of asphalt shingles, interior brick chimney, poured-concrete foundation, exterior of stretcher-bond bricks, integral front porch with original brick posts and a solid brick railing, ca. 1980 glass-and-wood door, ca. 1980 fixed-light and six-over-six vinyl sash windows, gable dormer with knee-brace brackets and paired six-over-six vinyl sash windows; flagstone entrance walkway, attached ca. 1970 concrete-block garage bay with a flat roof and wrought-iron balustrade.

Ca. 1970 steel storage building. Non-Contributing

15.) 325 Broad Street 119-0012-0236 Contributing
One-and-a-half-story, ca. 1915, gable-front Bungalow with an original crimped-metal roof covering, one interior and one exterior brick chimney, brick exterior and foundation, paired two-light wooden jalousie windows in gable field, paired one-over-one wooden windows, exposed rafter tails, central entrance bay with storm door, partial-width front porch with a hipped roof, solid brick rail, and tapered wooden posts. Asphalt parking area, wooden fence, metal-and-post fence.

16.) 112 Campbell Avenue 119-0012-0298 Contributing
One-and-a-half-story, ca. 1900, Craftsman house with a side-gabled asphalt-shingled roof with an interior brick chimney, exposed rafter tails, brick foundation, metal siding, one-over-one metal windows, gabled dormer with three single-light banked wooden windows. On the façade are three bays; one projects and has a bank of three windows; central bay has original single-light wooden door with a transom. Partial-width, integral wooden porch with posts.

Ca. 1900, original two-story hip-roofed garage has central brick chimney, six-over-six windows, and two ca. 1980 car doors.
Contributing

Ca. 1900, small, original, frame, gabled shed. Contributing

17.) 134 Campbell Avenue 119-0012-0273 Contributing
One-and-a-half-story three-bay Colonial Revival dwelling built ca. 1940 has a gable roof of asphalt shingles, a concrete foundation, exterior of stretcher-bond brick, ca. 1980 wood deck with a square-baluster railing, ca. 1980 shed-roofed entry porch with wood posts, original multiple-light glass-and-wood door, ca. 1990 one-over-one vinyl sash windows, three gabled dormers with vinyl siding and ca. 1990 fixed single-light vinyl windows. Gable-roofed side porch with brick columns; basement-level garage entrance with an original glass-and-wood overhead-track door. Stone steps, asphalt driveway.

18.) 142 Campbell Avenue 119-0012-0274 Contributing
One-and-a-half-story four-bay Tudor Revival dwelling built ca. 1940 has a gable roof of asphalt shingles, an interior and exterior wall brick chimney, a concrete foundation, exterior of stretcher-bond brick, projecting gabled bay entrance has an original three-light glass-and-wood arched door and brick surround with a brick keystone, second projecting gabled bay on this façade has stucco and half timbering. Windows date from 2000 and have multiple-light fixed, eight-over-eight, and six-over-six vinyl designs with brick sills. Secondary entrance with a ca. 1990 glass-and-wood door; gable-roofed side porch with an original 15-light glass-and-wood door, ca. 1970 metal awning, arched brick openings with keystones. Asphalt driveway, concrete walkway and stairs to the porch.

19.) 148 Campbell Avenue 119-0012-0275 Contributing
One-story four-bay brick Tudor Revival dwelling built ca. 1940 has a hipped asphalt-shingled roof, an exterior of stretcher-bond brick, a concrete foundation, and an exterior, façade wall, brick chimney, gabled entry bay with an original arched wood door with a circular light within concentric recessed brick arches; original four-light paired steel casement windows with transoms and brick sills, gable fields with rectangular louvered vents; corner integral porch with arched openings and a wrought iron railing, ca. 1960 metal awnings, original 15-light glass-and-wood door; an asphalt driveway.

20.) 154 Campbell Avenue 119-0012-0297 Non-contributing
One-story frame Ranch-style house built ca. 1970 clad with vinyl siding and has a side-gable roof and asphalt shingles.

123.) 419 East Main Street 119-0012-0312 Contributing
Behind the houses lining East Main Street is a cemetery established ca. 1887. A Virginia Civil War Trails marker at the head of the driveway gives biographical information about William Elisha Peters, an officer with the Second Virginia Cavalry, CSA and professor, whose body was buried here in 1906. Other grave markers bear the names of Pendleton, Campbell, Fairman, Sheffey, Haller, Peters, and Preston; some of these family names now double as local street names. An original wrought-iron fence encloses the approximately 40 by 40 foot plot and its approximately 20 markers. About a quarter of the markers are modern. Many of the historic markers are in good repair, while a few are broken and some are likely missing.

124.) 421 East Main Street 119-0012-0263 Contributing
Ca. 1940, one-and-a-half-story Tudor Revival house with a concrete foundation, stretcher-bond brick exterior, cross-gabled roof with asphalt shingles, exterior brick chimney on the façade, original four-over-one wood-sash windows, other wood-sash windows with a diamond-light pattern, integral porch has arched openings, high-pitched gable fields have arched, diamond-light, wood casement windows; slightly projecting entrance vestibule with a gable-front roof and original multiple-light octagonal-pane glass-and-wood door, rear cross-gabled wing with a basement garage with an overhead-track wood paneled door with a row of glass panes at its top; screening fence around HVAC, brick path.

125.) 427 East Main Street 119-0012-0264 Contributing
One-and-a-half-story, three-bay, ca. 1925 Bungalow with a concrete foundation, stretcher-bond brick exterior, side-gabled roof with asphalt shingles, one-over-one wood sash windows, interior brick chimney, full-width, three-bay porch with tapered brick posts, original single-light glass-and-wood door and single-light sidelights and transom, bay window, large gable dormer with wood-shingle siding and eave brackets; main roof also has brackets. Between the basement and the ground floor is a brick soldier course; shed-roofed, enclosed, side entrance with an original single-light glass-and-wood door; driveway, walkway, chain-link fence encloses back yard.

126.) 503 East Main Street 119-0012-0265 Contributing
One-and-a-half-story, three-bay, ca. 1935 Bungalow with a concrete foundation, stretcher-bond brick exterior, side-gabled roof with asphalt shingles, two interior brick chimneys, original three-over-one wood-sash windows, some with metal awnings, partial-width, gable-front porch with arched openings, original three-vertical-light glass-and-wood arched door. Between the basement and ground floor is a brick soldier course; rear garage bay with a side-hinged wooden door is flanked by curved brick retaining walls, gravel driveway, concrete parking area, concrete walkway painted to resemble slate.

Ca. 1935 shed of concrete block construction with an original five-panel wood door and gable-front metal roof. Contributing

127.) 506 East Main Street 119-0012-0290 Contributing
One-and-a-half-story, three-bay, ca. 1925, brick Bungalow with a concrete foundation, stretcher-bond brick exterior, interior brick chimney, six-over-one vinyl-sash windows, side-gabled roof of asphalt shingles, partial-width, integral, two-bay porch with tapered brick posts and a closed brick railing, ca. 1970 wood door, shed dormer with vinyl siding; exterior, wooden staircase with a canopy cover leading to the upper floor entrance; at the rear of the staircase is a wooden ramp; rear, vinyl-sided addition; asphalt driveway, rock wall, walkway.

Marion Historic District Boundary Increase
Marion, Smyth County, Virginia

STATEMENT OF SIGNIFICANCE

Summary Statement & Justification of Criteria

The Marion Historic District in Smyth County, Virginia, was originally listed in 2000 on the National Register of Historic Places under Criterion A for its local significance in commerce and education and Criterion C for local significance in architecture. The same criteria apply to this boundary increase because, under Criterion A, the district represents broad patterns of development of a county seat in a region of rapid industrial and commercial growth during the late nineteenth and early twentieth centuries. County seats in the region of southwestern Virginia were centers of population, thus, commerce, education, and politics, as pioneers moved westward to establish new communities. Under Criterion C, Marion's prosperity from the late nineteenth through early twentieth centuries is evident in the extant architecture of the period. As a whole, the existing district and boundary increase comprise an intact, contiguous area containing commercial and institutional properties lining the principal blocks of Main Street and domestic structures in neighborhoods to the north and south. The period of significance begins in 1855, as justified in the original district nomination, and ends in 1958, the year the latest contributing resources were constructed within the new district boundary.

Historical background

Earliest settlers came to the southwestern region of Virginia in the mid-eighteenth century. Stephen Holsten, Charles Sinclair, and Samuel Stalnaker claimed thousand-plus-acre tracts along the Middle and South Forks of the Holston River. These were recorded by surveyor James Patton in 1748. However, raids during the French and Indian War thwarted permanent settlement attempts in the region until 1769. Twenty years later, the Virginia General Assembly directly influenced rapid immigration to the area through the order of a new road over the Cumberland Mountains into Kentucky. The Wilderness Road led pioneers into the southwestern portion of the state. The area that became the town of Marion, originally included in a land grant to the Campbell family, was situated along both the Wilderness Road and the Middle Fork of the Holston River. These features figured significantly in the development of Marion.¹

Smyth County was established in 1832, taking portions of Washington and Wythe Counties. Land was selected for the site of the county courthouse, and the town was named after Revolutionary War General Francis Marion. The courthouse was completed in 1834, and the streets surrounding it quickly became populated with houses, mercantiles, livery stables, and taverns. By 1835, the population of Smyth County was over 6000, including 1400 slaves; 100 people lived in Marion, including three attorneys and two doctors.² In 1846, the General Assembly of Virginia called for the construction of a road from Salem, westward, through Marion. The Southwestern Turnpike, following the path of the Wilderness Road, provided a macadamized road surface, which allowed Marion continued growth in population and trade. Additionally, by 1848, the Virginia and Tennessee Railroad was under construction, spanning 328 miles from Petersburg

to Bristol, also running through Marion.³ These land routes of transportation, along with rivers, provided Smyth County, with Marion as its county seat, ample opportunities to move products to market, ensuring their success and growth.

Criterion A: Commerce & Education

During the decade prior to the Civil War, Smyth County prospered through agriculture, industry, and mineral extraction. Along with salt, the county was abundant with gypsum and limestone, which were used to fertilize cropland. In 1850, the county produced 301,222 bushels of corn, 34,742 bushels of wheat, 139,580 bushels of oats and 100,410 pounds of butter. Industrially, in Smyth County there were seven saw mills, three iron furnaces, one iron foundry, one salt furnace and two tanneries. With a population of 8162 (including 1064 slaves), Smyth County contained twelve churches and 600 pupils attending public schools.⁴ On record in Smyth County during the mid-1850s were fourteen dry goods mercantiles, seven hotels, four industrial manufacturers, and eight physicians.⁵

While Smyth County's infrastructure suffered destruction wrought by the Civil War, it rebounded quickly, continuing the industrial growth begun in ante bellum years. Rail lines and bridges were quickly repaired to ensure continued access to markets. During the post-war period, rail mergers became common, and the Virginia and Tennessee Railroad reorganized as the Atlantic, Mississippi, and Ohio railroad, expanding Marion's commercial sphere. Lucrative crops shipped from the fertile valley included corn, wheat, tobacco, oats, and buckwheat, as well as dairy and orchard products. Smyth County continued extracting salt, limestone, and gypsum, and, in addition, marble, copper and iron ore.⁶

The county's population grew from almost 9000 in 1860 to 12,160 by 1880, or thirty-six percent.⁷ By 1887, the number had grown to 14,000, with 1300 people residing in Marion. The county seat by that time had evidenced its importance in finance via the establishment of the Bank of Marion, newspaper publishing via the *Conservative Democrat*, and leisure entertainment via the Seaver's Opera House, the county's only bank, newspaper, and opera house, respectively. Health care professionals of Smyth County were concentrated at Marion, where three of the county's five dentists, both of the county's druggists, and four of its thirteen physicians practiced. For lodging accommodations, Marion offered travelers three of the county's four hotels; two boarding houses were also available in Marion.⁸

Commercial enterprise flourished in Marion, while agricultural-based activity within the county continued to expand. In 1887, Marion boasted eleven of the county's twenty-seven general merchandise establishments, four blacksmiths, three butcher markets, two grocers, two hardware stores, three insurance agents, four carpenter-builders, and three jewelers. Across Smyth County were twenty-three grain mills, fourteen sawmills, three woolen mills, six saddle makers, and four tanners. The majority of the county's population was engaged in farming.⁹

Education also made advances in Smyth County following the war. While, Smyth County students already enjoyed access to public schools, the 1869 Underwood Constitution of Virginia mandated state funding of public schools (as well as extended the right to vote to all males over the age of twenty). In Marion, a new grammar school was built. One-room schoolhouses were built for rural residents throughout the county. Education for African American students was limited to log houses or outbuildings, typically with teachers educated in the North. By 1887, Smyth County has fifty-seven white schools and seven black schools. Private schools were also available to students of Smyth County and Marion.¹⁰

Before 1870, Marion had one co-educational secondary school, established by J.J. Schere. In 1873, Marion became home of two new private educational institutions, the Lutheran Church-based Marion Female College, located west of downtown north of Main Street, and the Marion Male Academy. The latter was also located west of downtown Marion within a residential district on College Street. The academy's objective was to prepare students for university coursework, as well as provide extracurricular activities. The Marion Male Academy was listed on the National Register of Historic Places in 1989, representing the town's leadership in education in southwest Virginia.¹¹

The town of Marion had by the 1880s established itself as an important center of public and private productivity. When the need for an additional state mental health institution became evident, the Virginia General Assembly appointed a commission to locate a site for a new facility, and the town of Marion became the choice in the southwest region. Completed in 1887, the Southwestern State Hospital became a leading employer in Marion.¹² The location chosen for the hospital, east of downtown on East Main Street, would later influence the development of a residential neighborhood as Marion continued to expand.

Rapid industrialization occurred in Marion during the years leading into the twentieth century. The railroad was bought by a private bank in Philadelphia and was renamed the Norfolk and Western Railroad. New steel tracks were laid, allowing for greater freight transportation, including of coal. Public water lines were laid in 1888, and the Smyth County Telephone Company was organized. The Marion Light and Power Company was established in 1900. The Norfolk and Western built a passenger depot northeast of downtown Marion in 1903, at which time there were two banks in town. Marion's population continued

growing, to 2045 people by 1900;¹³ the population of Smyth County was 17,230. While agriculture provided livelihoods for the majority of residents, increased industrialization had made Marion a financial and commercial center of the southwestern region.¹⁴

By 1907, Smyth County had grown its public school system to sixty-one buildings with eighty-eight teachers. There were forty churches at that time, and a three-decade old ban on the sale of alcohol within the county suggests a collective civic progressivism. Marion's inclination towards improvement and stability was reflected in the decision to raze its pioneer, 1834 county courthouse and replace it with a new and larger one built in 1905 in the Neo-classical style.¹⁵ Following its thematic use at the 1893 World's Fair, Neo-Classical architecture was thought to represent the height of modern culture, and Marion's new county courthouse re-affirmed the city's regional leadership not only in public matters, but in finances, education, and commerce.

The ideals of simplicity and stability associated with Neo-Classicism were in practice at the growing Southwestern State Hospital (119-5006). With over 500 patients in 1907, the facility was a model of self-sufficiency. It maintained its own electric light and power plant, and enjoyed a gravity-fed supply of water from a natural spring three miles from Marion. The hospital's farm produced over \$12,000 in produce supplying patients and employees with nearly 25,000 gallons of milk and 11,000 dozen eggs in 1907.¹⁶

Agriculture remained the basis of the economy for much of Smyth County during the early part of the century. It was common for a county poultry farms to ship 300,000 dozen eggs to market, as well as thousands of hens, turkeys, and ducks. The uplands of the valley were covered in indigenous bluegrass, a livestock forage so plentiful in Smyth County and rich in nutrients, that no corn was required to fatten cattle for market. Vegetables from cabbages to potatoes to apples were grown in abundance, thanks to rich river bottoms and temperate climate.¹⁷ With access to rail transportation in Marion, county farmers could quickly move produce to market.

Marion industry continued to prosper in these years as well. The Look & Lincoln factory, making wagon and plows since 1865, became the Virginia Table Works company in the early twentieth century, shifting its focus to furniture making. The Marion Foundry and Machine Works expanded to include railroad repair services. By 1920, Marion's population was 3253. Railroads continued to dominate transportation of freight, and the establishment of the first state highway by the Virginia General Assembly ushered in the era of automobile transportation for passengers. The state highway commission assumed the responsibility of road construction and maintenance. The state road, running from Winchester to Staunton, Virginia, continued through Smyth County and Marion as US Highway 11, also known as the Lee Highway. Accordingly, automobile sales stores, repair garages, and fuel stations appeared on the Marion landscape.

Marion, Smyth County, Virginia

The economy of the area was booming, and new banks, hotels, and entertainment venues joined the Main Streetscape of downtown Marion.¹⁸

During the 1930s, Marion experienced continued advances in public facilities, as its population continued growing. During 1931, the Southwestern State Hospital's Henderson Building (119-004) underwent a physical transformation from the Italianate to the Colonial Revival style. The change reflected the shift away from Victorian embellishment towards a more reserved manifestation of order and simplicity. During the same period, a WPA post office (119-0008) was constructed in the Colonial Revival style in 1934-35. Improvements in black education included the establishment of the Carnegie School in Marion. The new Marion High School (119-0012-0369/119-0013), now the Marion Middle School, opened in 1938, exemplifying the symmetrical balance and modest adornment of the Colonial Revival style. Located at 134 Wilden Street, east of downtown Marion, the school was sited in the neighborhood that grew up around the Southwestern State Hospital.

From the intersection of West Main and Pendleton Streets, the terrain rises high above the downtown commercial area. The location of the hospital at the top earned the East Main Street extension the name "Hospital Hill." While the hospital itself is set far back from the street, Bungalow and Colonial Revival style dwellings created a residential neighborhood beginning in the early twentieth century, with many homes dating to the 1920s. The neighborhood reflects the natural expansion of the town, but still in a compact arrangement bordering the commercial area. In 1927, famous novelist and short-story author Sherwood Anderson had moved to Marion. The author nicknamed Marion's downtown commercial area "the Rialto" for its excitement and entertainment. From Hospital Hill, one could look down on the busy "Rialto" that captured Anderson's fancy. Though Marion was the bustling center of the southwestern region of Virginia, Anderson considered it a charming country town. When he bought the town's two newspapers, merging them into the "Smyth County News and Messenger" and became its editor, he created a fictional character "Buck Fever," a local mountain man, as his voice of his news reporting.¹⁹

By 1940, Marion's population had grown to 5177. Accordingly, there was an increase in single-dwelling and multiple-unit housing construction. With a new high school, Marion was able to convert the former high school building on Church Street into an elementary school in 1946. Marion's population continued to grow through the war years, increasing to 6982 by 1950.²⁰ Settlement patterns remained largely unchanged in Smyth County and Marion though 1960. However, with the 1960s construction of Interstate 81, parallel to Highway 11, the compact arrangement centered on Main Street was no longer the model followed. Commercial businesses could move to the outskirts and still offer convenient access to consumers, and residential subdivisions could offer larger lots and new construction outside of the city limits. Though a few buildings were added to the Marion Historic District during the 1950s, the decade signaled the end of familiar commercial and residential development patterns.

Marion, Smyth County, Virginia

Criterion C: Architecture

Established in 1832, the history of the development of Marion is closely tied to the town's relationship with the main road (Highway 11, today), a major thoroughfare and route of commerce. Marion's growth reflects broad patterns of development of the county seat of Smyth County along an important trade route, including rapid industrial and commercial growth during the late nineteenth through early twentieth centuries. Marion's central location in the county, rail and water transportation routes, and rich natural resources, facilitated its growth. Commercial buildings and the earliest dwellings of Marion were located along Main Street. As the economy prospered, residential neighborhoods expanded to the streets north and south of the commercial area. The town's prosperity is reflected in the quality of its architecture, the extant commercial and residential buildings, dating from the late nineteenth and early twentieth centuries.

As the original Marion Historic District nomination lists and describes the 180 primary resources within its boundaries at the time of listing (2000), this Boundary Increase addresses the resources of adjacent neighborhoods that were unavailable for inclusion at that time, due to the limited scope of survey. A total of 272 buildings and 2 sites are included in the boundary increase. Most of these are located to the northeast and east of the existing district and include residential neighborhoods and a commercial corridor along Pendleton and North Main Street. To either side of this strip of commercial establishments are three concentrations of dwellings, the first including Wilden, Locust and East Main Street and the second including blocks of Lee, Franklin, Maple, Broad and Chestnut Streets, to the north of the district. Additionally, a third smaller residential neighborhood is located to the southwest of the existing district on West Cherry Street.

The neighborhood along West Cherry Street begins at the intersection of West Cherry with Sheffey Street, and continues southwest to Poston Street. This neighborhood was developed over several decades, featuring houses from ca. 1890 through the 1930s. There are several examples of ca. 1890 vernacular form dwellings, such as the two-story central-hall I-house at 138 West Cherry (199-0012-0162), at the northeast end of the neighborhood, as well as simpler one-story, side-gable dwellings from the same time, as at 228 West Cherry Street (119-0012-0169), at mid-neighborhood, and 360 West Cherry Street (119-0012-0192), at the southwest end of the street. The central-hall plan, a popular vernacular form of this period, had a symmetrical arrangement of rooms to each side of the central hall. Typical of the form, these examples feature side gable roofs with an end chimney at each gable and full-width, one-story porches.

On West Cherry Street, several Bungalow dwellings are present. These houses typically date from the 1920s and are one- or one-and-one-half-story in height. Their roof shape can be single- or complex-gabled or even hipped. The front porch is a defining feature of the Bungalow design, as seen at 223 West Cherry Street (119-0012-0170) and 214 West Cherry Street (119-0012-0165). The Bungalow is closely associated with the Craftsman style, which continued in popularity into the 1930s. Generally, the Craftsman movement occurred in response to machined mass production and busy Victorian embellishment, in both architecture and furniture design. The Craftsman style embraced the individualism of artisanship, rejecting ornate ornamentation for simpler, basic forms. The open plans of these dwellings contrasted sharply with Victorian compartmentalization. Examples of Craftsman architecture can be found at 304 West Cherry Street (119-0012-0175) where the ca. 1935 one-story Craftsman house features multiple chimneys, including one on the façade, wooden brackets, and a four-bay façade, with three projecting bays within a single front-gabled section, and a fourth cross-gable porch bay. The ca. 1935 Craftsman at 314 West Cherry Street (119-0012-

United States Department of the Interior
National Park Service

National Register of Historic Places

Continuation Sheet

Section number 8 Page 40

Marion Historic District Boundary Increase
Marion, Smyth County, Virginia

0180) is a front-gabled dwelling set atop a hill, askew from the street and accessed by wooden steps and a walkway and has an entrance both under its full-width porch and its long side.

Another Marion neighborhood with similarly dated resources is located to the north of the existing district's east end. East Strother, East Lee, and Franklin Streets are parallel to Main Street; cross-streets in this neighborhood are Broad, Chestnut, and Maple Streets. This neighborhood adjoins the existing district where residential buildings were constructed behind the commercial blocks. As on West Cherry, ca. 1890-1910 Center Hall plan dwellings can be found, both two-story examples, as at 305 Broad Street (119-0012-0234), and one-story models, at 325 Maple Street (119-0012-0350). These dwellings have the typical side gable roof common for the plan. Another early twentieth-century vernacular form found in this neighborhood is the pyramid square plan, found at 320 and 326 Maple Street, (119-0012-0352) and (119-0012-0354), respectively. As the name suggests, these one-story forms have square dimensions with a pyramidal roof shape. They date to ca. 1915. Bungalows are also found here, as at 219 Broad Street (119-0012-0231), which has several typical features such as exposed rafter tails, knee brace eave brackets, and a front porch.

Into the twentieth century, more distinct styles of architecture begin to appear in residential neighborhoods, such as Tudor Revival dwellings at 215 and 211 Broad Street, (119-0012-0230) and (119-0012-0229), respectively. This style was popular from the 1920s through the 1940s. The style may feature projecting bays with gabled roofs, as at 211 Broad, whose projecting bay has a diamond shaped window pane, a common embellishment for a gable field or entrance. A common exterior treatment found in the Tudor Revival style is stucco with half-timbering, as at 215 Broad Street.

As noted, Marion's pattern of development consisted of commercial buildings along Main Street and dwellings to the north and south. Broad Street exemplifies this arrangement, as a cross-street to Main that has both commercial buildings, in the first blocks from its intersection with Main, and residences, on the blocks further away from the town's commercial thoroughfare. At 116 Broad Street (119-0012-0225) is a two-story, brick commercial building from ca. 1945. It displays typical characteristics of a commercial building from this period with a façade featuring original brick bulkheads, display windows, and a flat roof. This particular building also has original Carrara glass panels, popular during this period when the smooth, shiny surfaces of Art Moderne were in style.

During the early-to-mid-twentieth century, Art Deco was also a popular architectural style. Featuring geometric designs, it was used mainly for public and commercial buildings. In Marion, the Art Deco style was used at 103 – 105 Pendleton Street (119-0012-0356), south of the intersection of Pendleton and Main Streets. This ca. 1915 one-story Art Deco warehouse has metal-cased display windows divided by corbelled brick pilasters with stepped caps, creating an emphasis on the vertical. Above are ca. 1940 Carrara glass panels. Moving away from Main Street, south along Pendleton Street, there is a mix of residential and commercial buildings, dating from ca. 1910 to ca. 1940.

Where Pendleton "T's" into Main Street, the latter divides into East Main, ascending "Hospital Hill," a residential neighborhood, and North Main, which continues as a mix of commercial and residential. Among the former are historic commercial buildings, as at 315 North Main Street (119-0012-0320) a

United States Department of the Interior
National Park Service

National Register of Historic Places

Marion, Smyth County, Virginia

ca. 1915 two-story, five-bay building with stretcher-bond brick veneer with a tapestry-brick insert; original residences adapted for commercial use, as at 323 North Main Street (119-0012-0322) a ca. 1920 Bungalow with an original Craftsman door and sidelights and a three-bay porch with brick posts; and modern, franchise buildings, such as the Hardee's fast-food restaurant at 347 North Main Street, (119-0012-0326). Residential buildings on North Main Street include single and multiple dwellings. At 405 North Main Street (119-0012-0328) is a two-story, frame, three-bay Queen Anne dwelling built ca. 1900 with original milled columns, milled railing, and spindled frieze, and porch eave brackets, typical of the style. At 411 North Main Street (119-0012-0329) is a similar style, the Folk Victorian, here found on the vernacular gable-and-wing house plan. The ca. 1895, one-story, frame dwelling has original milled brackets, original two-light-and-two-panel glass-and-wood doors, original six-over-six wood sash windows, original saw-tooth valances, and saw-tooth shingles in gable fields. At 516 North Main Street (119-0012-0338) is a ca. 1920, two-story, two-bay apartment building with a flat roof with a parapet and six-course American-bond brick exterior. North Main Street continues with commercial buildings, both historic and modern, towards the train depot, after which a handful of original dwellings have been adapted for commercial uses.

The East Main Street neighborhood began its development around the turn of the twentieth century. By that time, the Southwestern State Hospital had been in operation over ten years. As it grew, it came to employ many Marion residents. The neighborhood that developed along east Main and Locust Streets was a logical expansion on Marion's residential neighborhoods. The earliest dwellings are of vernacular form, such as the gable-and-wing plan at 350 East Main Street (119-0012-0287) and the two-story, central hall plan at 181 Locust Street (119-0012-0246). Bungalows are most prevalent in the neighborhood, signifying a surge of growth during the 1920s. The Bungalow at 416 East Main Street (119-0012-0289) features a complex roof, a characteristic common to the style; the Bungalow at 188 Locust Street (119-0012-0283) features a full-width porch with original Tuscan columns on brick piers and an original single-light glass-and-wood door with a single-light transom and sidelights, all typical characteristics.

Other styles that followed include Tudor Revival, Colonial Revival, and Ranch dwellings. The Tudor Revival at 315 East Main Street (119-0012-0258) has a rock-faced, exterior wall chimney on the façade and a small vestibule entrance. These are common characteristics of the style. These and other Tudor Revival traits, such as the high-pitched, cross gable roof and diamond-light fenestration, are found at 421 East Main Street (119-0012-0263). At 522 East Main Street (119-0012-0292) is a two-story Colonial Revival displaying the symmetry typical of the style, with a central entrance flanked by matching fenestration. During the 1930s, this neighborhood was selected by the city for the location of a new Marion High School, suggesting that local government took note of the growing neighborhood to the east of downtown. Originally, the city high school was located on Church Street, two blocks north of Main Street, in downtown Marion. This neighborhood to the east continued growing into the mid-twentieth century, as seen by several dwellings from that time, such as Ranch style houses. The ca. 1945, one-story Ranch dwelling at 185 Locust Street (119-0012-0247) is characteristically low and long, further emphasizing the horizontal with original two-over-two horizontal wood-sash windows and an original three-horizontal-light glass-and-wood door. As often seen in the Ranch style, this example has a (triple) single-light picture window.

Buildings in the Marion Historic District illustrate the development of the town, expanding outward from the commercial corridor along Main Street. Residences are found within the blocks to the north and south. The construction dates of these dwellings demonstrate as a group the gradual process of in-filling of residential

Marion, Smyth County, Virginia

neighborhoods. The earliest neighborhoods were laid out beginning after the Civil War through the 1880s. The principal streets to the north of Main Street were Strother and Lee (then called Foundry) Streets; to the south of Main Street, Cherry was the main residential street. Development spread more to the west than east at that time. A Sanborn Map from 1885 shows that Marion was concentrated between Chestnut Street to Sheffey Street on the west. Most of the earliest growth centered around the courthouse, approximately equidistant from the above north-south streets. A 1908 map shows a mix of brick and frame structures; by 1927 the majority of the commercial building stock was of masonry. By this time, the previously vacant spaces within residential blocks were filling. This compact development continued through the mid-twentieth century, at which time interstate construction influenced a shift in patterns of development, with businesses and residences moving to the outskirts and beyond, rather than continuing to center on downtown Marion.

Marion Historic District Boundary Increase
Marion, Smyth County, Virginia

VERBAL BOUNDARY DESCRIPTION

The boundary of the Marion Historic District, as amended, begins at the northwest corner of the district with 411 and 412 College Street, west of the intersection of Poston Street; thence east along College Street to 329 College Street at the west terminus of North Street and including all properties on both sides of Funk, Bluff, North, Maple, Chestnut, and Franklin streets, south of River Street and west of N. Commerce Street. Thence proceeding east from the corner of N. Commerce and Elee streets across a tributary of the Holston River, from where the north boundary is defined by the Holston River until it turns south along Campbell Avenue, which defines much of the eastern boundary of the district. From the river's southerly turn the boundary extends east on the north side of N. Main Street only, as far as 715 N. Main Street, just east of Holston Street. From the corner of Campbell Avenue and E. Main Street, the boundary turns south and west to include both sides of E. Main, Locust, Tazewell, Wilden, Cedar, and Pendleton streets, as well as Acton Lane on the south side of E. Main. Proceeding west, the district includes the east side of S. Commerce Street as far as 303 Commerce, 216 E. Town Street and both sides of S. Chestnut on the south side of E. Town Street; turning south following the original district boundary to include lots on the south side of Cherry Street, then continuing to include all addresses on the south and north sides of Cherry Street proceeding west to S. Poston Street, where the boundary turns north to rejoin the original boundary at the intersection of S. Poston and S. Main streets. The boundaries of the entire district, including the amended area, encompass approximately 130 acres. Of the 130 acres, 61 acres made up the original district, designated in 2000. The accompanying map illustrating the boundary is drawn at a scale of 1" = 400'.

VERBAL BOUNDARY JUSTIFICATION

The Marion Historic District boundary is drawn to include the largest concentration of contiguous commercial properties in the downtown area and residential properties in adjacent neighborhoods that retain integrity. The boundary represents the historic compact arrangement of the town as it developed into a center of commerce and education for Smyth County and the region of southwestern Virginia, beginning with its founding and extending through the 1950s. The original nomination for the district concentrated on the historic commercial area and the residential area to the north and west of downtown. This boundary increase includes all of the contiguous properties that possess architectural and historical significance as well as integrity.

Introduction

The Marion Historic District was originally listed in the National Register of Historic Places on August 2, 2000. A nomination to increase the historic district's boundaries was listed in the National Register on July 28, 2011. This additional documentation is being submitted to correct mapping of the historic boundary and entries in the district inventory associated with the 2011 boundary increase nomination. The historic district's boundaries *have not changed* as a result of this update.

Due to professional error, the dark outline of the historic boundary shown on the historic district's 2011 Sketch Map inadvertently excluded a section of the historic district between Cherry, Town, Chestnut, and Commerce streets. Thus, three properties that are within the 2011 boundary increase area were not included in the historic district nomination's resource counts in Section 5 or the narrative description in Section 7. This additional documentation is submitted to add the three properties within this area to the district's nomination. They are located at 123 S. Chestnut Street (contributing), 129-133 S. Chestnut Street (non-contributing), and 215 E. Cherry Street (contributing). The resource counts in Section 5 have been updated accordingly. An inventory entry and narrative description is included in Section 7. Section 10 is updated to include a corrected location coordinate. Additionally, a detail map showing the corrected boundary is included herein, as well as an aerial view Location Map that shows the historic district's current boundaries in their entirety and the updated location coordinate from Section 10.

The following pages provide information to update the Marion Historic District, keyed to the numbered sections of the original nomination form.

Section 5. Classification

Number of Resources within Property

(Do not include previously listed resources in the count)

Contributing	Noncontributing	
<u>206</u>	<u>69</u>	buildings
<u>1</u>	<u>1</u>	sites
<u>0</u>	<u>0</u>	structures
<u>0</u>	<u>0</u>	objects
<u>207</u>	<u>70</u>	Total

Section 7. Description

Inventory

Following are the inventory entries and narrative descriptions for the three properties that were inadvertently omitted from the 2011 nomination's inventory.

216.) Commercial Building, 123 S. Chestnut St. 119-0012-0376 Contributing
 Located at the southeast corner of E. Town and S. Chestnut streets with no setbacks, the c.1925 building occupies tax parcel 210-125-1. It is a one-story brick building, which most recently held a chiropractor's office, with a low-pitch hip roof and an arched main entry on Chestnut Street, sheltered by a fabric awning. The windows have fixed steel sash. Much of the brickwork looks modern, but some, particularly the common-bond north elevation foundation, looks original. The building is now connected to the c.1938 two-story building at 214-216 E. Cherry Street by a small, one-story brick hyphen. The parcel is depicted as vacant on the 1921 Sanborn Insurance map, but the 1927 Sanborn map shows the building, labeled as "Virginia Table Co. Inc. Genl Offices." On the 1941 updated Sanborn Map, it is labeled "Feed and Fertilizer."

217.) Commercial Building 129-133 S. Chestnut St. 119-0012-0377 Non-contributing
 The c. 1970 building stands on the northeast corner of S. Chestnut and E. Cherry streets, fronting onto Chestnut with no setback. Although just one building, it is divided into three separate storefronts with separate addresses of 129, 131, and 133 S. Chestnut. It is a one-story flat-roofed brick-veneered commercial building built in at least two phases beginning ca. 1970. It has three storefronts facing Chestnut Street, capped with green metal awnings.

218.) Commercial Building, 215 E. Cherry St. 119-0012-0378 Contributing
 This c.1938 building occupies the entire tax parcel 190-88-70A, located between E. Town and E. Cherry streets, with no setbacks. It is a two-story brick commercial building with roof parapets, fronting to the south onto E. Cherry Street. It has steel sash windows and a vaulted steel-truss roof. The brick walls are laid in common bond. There are three freight doors, a steel fire escape from the second floor, and a covered loading dock on the front of the building. The Cherry Street building is attached by a small one-story brick hyphen to the rear elevation of the one-story building at 129 S. Chestnut Street. The two buildings are oriented perpendicular to one another. The parcel is shown as vacant on the 1921 and 1927 Sanborn Insurance maps, but the Sanborn map updated in 1941 depicts the building, labeled as "Whol. Groc. Gov't Surplus."

Section 10. Geographical Data

Location Coordinates Correction

In the 2011 nomination, coordinate #26 was taken at the point where the historic boundary was drawn incorrectly. The coordinate has been updated accordingly and is now show in decimal degrees as currently preferred by the National Park Service. The coordinate location also is shown on the attached district Location Map.

SKETCH MAP CORRECTION

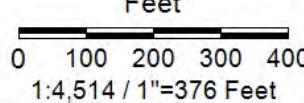

Marion Historic District Boundary

Increase

Smyth County, Virginia

DHR No. 119-0012

The sketch map that accompanied the original nomination had a slight error in the district boundary. A section of the historic district between Cherry, Town, Chestnut, and Commerce streets was inadvertently excluded from the historic boundaries shown on the original sketch map.
