DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The Egyptian Building is basically a temple-form structure with nearly identical facades at either end. These facades are each composed of a portico containing two palm capital columns in antis, with elongated pylons framing the porticoes at the corners of the building. The pylon motif is repeated as enframements for the windows on the sides of the building. Crowning the entire structure is a massive torus cornice and a very shallow hipped roof.

It is fortunate that such a significant building as the Egyptian Building has survived with few exterior alterations. Its carefully and precisely executed detail is a most scholarly interpretation of ancient forms. In 1939 the exterior of the building was renovated through the generosity of Bernard Baruch in memory of his father who graduated from Medical College of Virginia in 1862, and served as a Confederate surgeon during the Civil War. Unfortunately none of the original interiors survive; however, the present auditorium, installed during the 1939 renovation, contains interesting Egyptian-style decoration.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

In 1838 Hampden-Sydney College established a medical department in Richmond which occupied the old Union Hotel at 19th and Main Streets. Several years later this medical department was chartered by the state as the Medical College of Virginia. The Egyptian Building, designed by the noted Greek Revival architect, Thomas Stewart, was the first building put up especially for the new college. Completed in 1845, this exotic edifice was a radical departure from the current architectural traditions of the city. Not only has the Egyptian Building become a symbol of a distinguished school, it survives as the oldest medical college building in the South. Architecturally, the Egyptian Building ranks as the finest Egyptian Revival building in the nation.
