**NATIONAL REGISTER OF HISTORIC PLACES
REGISTRATION FORM**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Western State Hospital (Boundary Increase 2009)
other names/site number VDHR ID #132-0009, Western State Hospital Dairy Barn

2. Location

street & number 301 Greenville Avenue not for publication N/A
city or town Staunton vicinity N/A
state Virginia code VA county Staunton (Independent City) code 790 zip code 24401

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this x nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property x meets does not meet the National Register Criteria. I recommend that this property be considered significant nationally statewide x locally. (See continuation sheet for additional comments.)

 2/3/2010
Signature of certifying official Date
Virginia Department of Historic Resources
State or Federal Agency or Tribal government

In my opinion, the property meets does not meet the National Register criteria. (See continuation sheet for additional comments.)

Signature of commenting official/Title Date

State or Federal agency and bureau

4. National Park Service Certification

I, hereby certify that this property is:

- entered in the National Register
 See continuation sheet.
- determined eligible for the National Register
 See continuation sheet.
- determined not eligible for the National Register
- removed from the National Register
- other (explain): _____

8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
B Property is associated with the lives of persons significant in our past.
X C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

- A owned by a religious institution or used for religious purposes.
B removed from its original location.
C a birthplace or a grave.
D a cemetery.
E a reconstructed building, object, or structure.
F a commemorative property.
G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance (Enter categories from instructions)

ARCHITECTURE

Period of Significance 1930 - 1952

Significant Dates 1930; 1946

CONTINUATION SHEET**

**Western State Hospital
(Boundary Increase 2009)
City of Staunton, Virginia**

Section 7 Page 1

Summary Description

The proposed boundary increase for the Western State Hospital consists of 1.75 acres containing the dairy barn (contributing) and milk house (contributing) that supported dairy operations for the hospital patients as part of a large subsistence farming operation located south of the main hospital complex. The road that historically connected the dairy barn to the residential portion of the complex is used to connect these additional resources to the existing district and is a contributing structure. The buildings are a 1927-30 dairy barn, renovated in 1952; and a 1946 one-story milk house. The one-story vernacular agricultural dairy barn is built of poured concrete and frame construction with a gambrel roof and 25 bays. The interior spaces are intact and the holes in the floor for placement of the stanchions are still visible. The vernacular milk house, located across the road from the barn, is constructed of concrete block and has an asphalt shingle-covered side gable roof. The road has an asphalt surface.

Detailed Description

The Western State Hospital dairy barn is located near the southwest boundary of the complex. The historic access road connects the barn to the rest of the complex and extends northeast from the barn, then due north to connect to the road network of the more densely developed portion of the complex. A secondary road extends from the west elevation northwest, then north, behind the physicians' residences to the southwest perimeter of the current historic district.

The dairy barn was constructed between 1927-1930 in the Bungalow style and retains much of its integrity, despite a renovation of the building in 1952.¹ The poured concrete and frame 25-bay barn is oriented on a north-south axis and is approximately 260 feet long by 36 feet wide. It has a standing-seam metal gambrel roof with a one-bay cross-gambrel entrance porch on the east and an enclosed cross-gambrel projection on the west elevation. A loading dock with canopy-covered entry, constructed in 1952, is located on the south elevation and a wide, double-door entry is on the north elevation. The gambrel ends are coated in rough stucco and contain louvered vents and an arched multi-pane window in addition to the entrance doors. Character-defining features of the exterior include three-over-six hopper-style windows, exposed rafter ends that punctuate the eaves along its length, and cupola-style roof vents capped by cow-accented weathervanes. A pair of silos on the east elevation, evident in historic images, is no longer extant.

The 9,680-square-foot interior retains the integrity of the barn spaces with a sliding barn door between two areas and offices and refrigerated coolers for dairy product storage, likely added in 1952. Holes in the painted concrete floors are indicative of the stanchion attachment locations. Interior bearing walls are constructed of concrete block and partition walls of gypsum board. Plumbing and electrical fixtures are exposed and conduit is surface-mounted.

An adjacent one-story, two-bay concrete block milk house was built in 1946.² It measures 25 feet by 16 feet and has an asphalt shingle-clad, side-gabled roof and a metal six-light window with a hopper opening that is oriented horizontally within the two middle panes. Aluminum gutters are attached to the eaves and empty into downspouts at the corner of the building. A glazed area to either side of the offset door has been filled in with vertical boards and corrugated fiberglass panels. This 400-square-foot building was most recently used for storage.

(Boundary Increase 2009)
City of Staunton, Virginia**

Section 8 Page 2

Summary Statement of Significance

Located in the City of Staunton, Virginia, the Western State Hospital was listed in the Virginia Landmarks Register and the National Register of Historic Places in 1969 with boundary increases made in 2006 and 2007. The 2009 boundary increase includes a dairy barn and milk house that are locally significant to the district under Criterion C for Architecture. The barn's vernacular style incorporates a gambrel roof, Bungalow details, and picturesque cupolas with cow motif weathervanes. It represents the ideal of farming and honest labor as a mental health treatment modality. The district expansion's period of significance commences with the barn's completed construction in 1930 and continues through 1952 when it was renovated. The concrete block milk house, built in 1946 and located across the road from the barn, is a contributing resource to the expanded district. Both the dairy barn and the milk house are connected to the residential part of the complex by the historic roadway, a contributing structure. The agricultural operations of the hospital provided employment for nearly half the hospital's patients. The dairy barn and its accompanying milk house are the only extant buildings that represent the hospital's institutionalized subsistence farming operations that provided up to 66,000 gallons of milk per year for patients.³ Since 1981, the barn and milk house have been used for storage.

Historical Background

During the twentieth century the land holdings of Western State Hospital increased from 288 acres to 3,000 acres before reverting to the 82 acres transferred into the private ownership of Village Development Associates, LLC in 2005.⁴ Without this proposed expansion there is no representative building that directly relates to the significant agricultural operations of the hospital. Completed in 1930, the dairy/cow barn is the only surviving barn on the former hospital property.

At the beginning of the twentieth century, the hospital complex included 268 acres of farmland with plantings of hay and wheat and grape, apple, and peach orchards. The Annual Report for that year requested an additional 300 acres.⁵ As the number of patients undergoing treatment increased from 1,065 in 1906 to 1,624 in 1917, the need for additional land did as well.⁶ By the 1917 Annual Report, the hospital had 600 acres under cultivation and asked for an additional 200 acres.⁷

The first mention of the new cow barn appears in the 1924-1925 Annual Report in which an appropriation of \$6,000 is requested for the building.⁸ The appropriation was granted and the barn was under construction by 1927.⁹ During this time, additional acreage was being added to the hospital land holdings, which now totaled over 1,000 acres. The number of patients likewise had increased to 2,100 by 1927.¹⁰

The 1930 Annual Report states the cow barn has been "completed, equipped, and occupied." The capacity of the new barn is recorded as 104 cows with ten lying-in (birthing) stalls. Dr. DeJarnette, who was superintendent of the hospital, remarks that the "great fire hazard of the old barn" has been eliminated.¹¹

With a patient census of 2,400 in 1930, the hospital was consuming approximately 66,000 gallons of milk and canning 45,000 gallons of fruits and vegetables for annual use.¹² Nearly half of the patients were employed by the hospital, many in this subsistence agriculture. In that year's annual report, Dr. DeJarnette stated "selected employment continues to be our best remedial agent" and that "many admissions today are the products of self-indulgence and idleness."¹³ These statements echo the belief of the hospital's first superintendent Dr. Francis Stripling (1840-1874) in mental hygiene (medicine/social reform/prevention) and show a continuity of thought through the tenure of Dr. DeJarnette (1905-1943), spanning over a century.

Additional farmland continued to be acquired by the hospital with eventual landholdings of 3,000 acres and an equal number of patients by the 1950s.¹⁴ A new hospital complex was constructed near the intersection of I-81 and Richmond Road and operated concurrently with the old site.¹⁵ An additional barn (c. 1950s) associated with the hospital's expanded agricultural pursuits is located on the site of the Museum of American Frontier Culture, across Richmond Road from the new hospital complex. This newer barn lacks the level of architectural detail and originality of the 1930 barn and has been recently remodeled to serve as support space for the museum. Other barns found within the City of Staunton, such as

Section 8 Page 3

those associated with Cobble Hill Farm and the farms located on Bell's Lane supported much smaller farming operations and, therefore, lack the scale of the nominated structure. Only the barn at Cobble Hill (132-5013) is more sophisticated than the Western State Hospital barn, as it was designed by local architect, Sam Collins of the T. J. Collins and Son firm located in Staunton, Virginia.

By the 1970s, community-based treatment and social integration replaced the earlier treatment modalities. The patient count dropped by two-thirds and the old hospital site, with its aging buildings was abandoned in favor of the new site. The Virginia Department of Corrections took over the old hospital site in 1981¹⁶ and used the barn for storage. The Staunton Correctional Center closed in 2002, and the property was transferred to Village Development Associates, LLC in 2005. The City of Staunton continued to use the building for storage until recently.

Verbal Boundary Description

The boundary of the Western State Hospital (Boundary Increase 2009) includes the dairy barn, milk house and the historic approach road connecting the agricultural buildings to the main hospital complex as shown on the accompanying scaled map entitled "Western State Hospital (Boundary Increase 2009)."

Boundary Justification

The increase in the boundary of the Western State Hospital district includes the dairy barn and milk house that provided up to 66,000 gallons of milk a year for the patients of the hospital. The road connecting these agricultural buildings to the main complex provides the context for the boundary expansion as it provided the means of milk delivery and also would have been the route of travel for the many patients that were employed in the agricultural operations of the hospital as part of their treatment.

Re: **Western State Hospital Boundary Increase, City of Staunton**

Dear Mr. Miller:

On Behalf of the Commonwealth of Virginia, it gives me great pleasure to inform you that the Board of Historic Resources has placed the **Western State Hospital Boundary Increase** in the Virginia Landmarks Register. The State Review Board also recommended this property for inclusion on the National Register of Historic Places. Following final staff review, we will forward the nomination to the National Park Service, including my recommendation, along with the Board's, that the resource is eligible for listing in the National Register of Historic Places.

The Virginia Landmarks Register includes historic landmarks, buildings, structures, districts, objects, and sites which are recognized as having historical, architectural, or archaeological significance at a local, state, or national level. The **Western State Hospital Boundary Increase** deserves this official recognition as one of the Commonwealth's historic resources. The responsibility for preserving Virginia's irreplaceable historic resources rests ultimately with interested citizens like you. While registration does not in itself protect the property, we hope this formal recognition will provide encouragement to your continuing efforts to preserve this important part of Virginia's history.

The continuing protection and preservation of registered Virginia landmarks is of immediate concern to this office. We welcome the opportunity to serve, and it is our hope that you will inform us if we can be of assistance to you in providing any technical advice on contemplated alterations or sensitive renovations to properties.

Sincerely,

Kathleen S. Kilpatrick
Director and State Historic Preservation Officer
