COVID-19 PREVENTION QUESTIONNAIRE FOR DHR STAFF

A review and completion of this questionnaire is required for all DHR staff prior to entering the building. By answering the following questions, you are simply indicating your coronavirus (COVID-19) symptoms and status. The purpose of this form is to help protect you and all DHR staff and to manage the potential spread of the virus.

By answering yes to any of the questions, you should not enter the building but stay home, self isolate for a minimum of 14 days, seek medical attention, and get tested. If symptoms persist beyond 14 days, VDH guidance recommends being tested for COVID-19.

YES or NO, are you currently experiencing any of the following symptoms?

- A new fever (100.4°F or higher) or a sense of having a fever
- A new cough that you cannot attribute to another health condition
- New shortness of breath or difficulty breathing that you cannot attribute to another health condition
- New chills that you cannot attribute to another health condition
- A new sore throat that you cannot attribute to another health condition
- New muscle aches (myalgia) that you cannot attribute to another health condition, or that may have been caused by a specific activity (such as physical exercise)
- A new loss of taste or smell
- In the past 14 days, have you had close contact (within about 6 feet for 15 minutes or more) with someone with suspected or confirmed COVID-19?
- Have you had a positive test for the virus that causes COVID-19 disease within the past 10 days?

As previously stated, by answering yes to any of the questions, you should not enter the building but stay home, self isolate for a minimum of 14 days, seek medical attention and get tested. If symptoms persist beyond 14 days, VDH guidance recommends being tested for COVID-19.

In addition, if you are experiencing symptoms that you can contribute to another health condition, please stay home until you are well, and seek medical attention, if necessary.
